

The Speakers Bureau is a list of American College of Surgeons Young Fellows Association (ACS YFA) members—Fellows of the ACS under the age of 45—who self-identify themselves as experts in a clinical surgical topic and have a presentation ready to present to a live or virtual audience, or who are available to moderate an educational session or serve on an ACS committee.

The ACS YFA does not take responsibility for the quality of the presenter or content, nor does it participate in negotiations regarding the presentation. Those interested in contacting speakers will do so according to their institutional guidance and independently from the American College of Surgeons.

3D Laparoscopic Colorectal Surgery

LEARNING OBJECTIVES

- Clinical results of advanced 3D laparoscopic colorectal resections
- Understand the potential visual overload using 3D technology during minimally-invasive surgery
- To compare 2D and 3D perioperative results in colorectal laparoscopy

Speaker Location in:

Verona, Italy

[A Historical Perspective on Penetrating Abdominal Trauma](#)

LEARNING OBJECTIVES

- Describe a brief, contextual history of anterior abdominal stab wound diagnosis and management
- Identify specific penetrating abdominal injury management topics and the historical literature defined practice
- Exemplify diagnosis and management of rectal injury as reinforcement of a historical theme of penetrating trauma

Speaker Location in:

Mineola, NY

A Multimodal Approach to Pain

LEARNING OBJECTIVES

- Review the physiology of normal pain process
- Review the evidence for an opioid-sparing multimodal analgesia approach for the management of pain within the patient population and recommend specific dosing regimens
- Evaluate the key components of a comprehensive approach to improving patient safety and outcomes using a pain management stewardship model

Speaker Location in:

McAllen, TX

[A Surgeon's Role in Complex Inflammatory Bowel Disease](#)

LEARNING OBJECTIVES

- To understand when to operate in IBD
- To understand how operative decisions effect outcomes in IBD patients
- To understand which patients would benefit from a redo pelvic pouch procedure

Speaker Location in:

Port Jefferson, NY

Abdominal Trauma

LEARNING OBJECTIVES

- Approach to abdominal trauma
- Nonoperative abdominal trauma
- Complex exposures operative trauma

Speaker Location in:

Las Vegas, NV

Accessing Surgery

LEARNING OBJECTIVES

- How I become a surgeon
- What do my days look like
- How surgery makes my life better

Speaker Location in:

New York, NY

Achievement Goal Motivation in Surgical Education

LEARNING OBJECTIVES

- To describe achievements goal motivation in the content of surgical education
- To demonstrate the relationship of achievement goal motivation to wellness
- To show how understanding achievement goal motivation in learners can provide valuable information to faculty and program directors about a program

Speaker Location in:

Danville, PA

Acute Pancreatitis: Overview of Current Management

LEARNING OBJECTIVES

- Review the classification system of acute pancreatitis
- Review the current recommendation for treatment of acute pancreatitis
- Review the diagnosis and treatment of complicated pancreatitis

Speaker Location in:

Myrtle Beach, SC

Adopting Surgical Techniques in Practice

LEARNING OBJECTIVES

- Recognize imperative for continuous learning of techniques
- Understand adult learning theory
- Aligning training objectives with adult learning

Speaker Location in:

Boston, MA

Adoptive Cell Therapy for Advanced Soft Tissue Sarcoma

LEARNING OBJECTIVES

- Establish preclinical rationale for ACT in STS
- Preclinical data regarding immune infiltrate in STS
- Potential methods to optimize ACT in STS

Speaker Location in:

Tampa, FL

Adulting 101: Financial and Personal Advice for Post-Residency

LEARNING OBJECTIVES

- Fundamentals of financial independence
- Learn about pitfalls and prevention of financial mistakes
- Review steps to getting the best job after residency

Speaker Location in:

Houston, TX

Advanced Considerations in Complex Facial Reconstruction

LEARNING OBJECTIVES

- The attendee will understand nuanced problems encountered in head and neck reconstruction and available solutions
- The attendee will understand options for free tissue transfer to the head and neck
- The attendee will understand concepts in preoperative virtual planning for head and neck reconstruction

Speaker Location in:

New Orleans, LA

Adventures of a Junior Surgeon Scientist

LEARNING OBJECTIVES

- Delineate steps learners and teachers can take to prepare trainees for fruitful academic career
- Introduce skills for navigating a new institution
- Introduce skills for successful co-existence of clinical and academic work

Speaker Location in:

Duarte, CA

AI in the OR - Rebooting the Surgical Armamentarium

LEARNING OBJECTIVES

- Learn the history of AI
- Examine how AI is changing surgical practice
- Learn how AI is evolving to improve diagnosis

Speaker Location in:

New York, NY

American College of Osteopathic Surgeons, Benign and Malignant Liver Lesions

LEARNING OBJECTIVES

- Identify relevant anatomic liver structures
- Identify radiologic characteristics of benign liver lesions
- Identify characteristics of malignant liver lesions

Speaker Location in:

Myrtle Beach, SC

American College of Osteopathic Surgeons, Screening and Treatment of Portal Hypertension

LEARNING OBJECTIVES

- Understand the pathophysiology of portal hypertension
- Manage acute variceal bleeding
- Know the role of surgery in portal hypertension

Speaker Location in:

Myrtle Beach, SC

Antireflux Surgery

LEARNING OBJECTIVES

- Problem of reflux and its consequences
- Indication and presurgical evaluation
- Surgery options and outcomes

Speaker Location in:

Cleveland, OH

[Are you Ready? The Path from Student to Resident to Practice - Understanding the Non-Clinical Aspects of Advancement](#)

LEARNING OBJECTIVES

- Define mandatory requirements of progression
- Clarify boarding, licensure, credentialing and how to navigate
- Understand on-boarding and the expectations for a new hire

Speaker Location in:

Reading, PA

Autologous Chondrocyte Implantation in Huge Patellar Articular Cartilage Defect

LEARNING OBJECTIVES

- Management of huge patellar cartilage defect
- ACI is associated with good results
- ACI in young individuals gives excellent results

Speaker Location in:

Ahmedabad, Gujarat

Axillary Management —to Clip or Not to Clip

LEARNING OBJECTIVES

- To understand the technical features of sentinel node biopsy after neoadjuvant chemotherapy
- To understand how nodal clipping impacts management
- To review oncologic outcomes of sentinel node biopsy after neoadjuvant chemotherapy

Speaker Location in:

Boston, MA

Bariatric Surgery

LEARNING OBJECTIVES

- Overview the problem of obesity
- Indications
- Surgical options and outcomes

Speaker Location in:

Cleveland, OH

Bariatric Surgery: A Gateway to Healthier Living

LEARNING OBJECTIVES

- Understand the role of bariatric surgery in management of medical disease
- Understand the role of bariatric surgery as a prerequisite to other surgery such as transplant, joint replacement, and fertility treatment
- Understand the patient pathway from surgical clinics to bariatric surgery

Speaker Location in:

Galveston, TX

Becoming a Leader in Oral and Maxillofacial Surgery

LEARNING OBJECTIVES

- To identify the possible paths to leadership positions in OMFS
- To better understand the qualities and characteristics of a leader
- To gain an appreciation for academic oral and maxillofacial surgery and the path to success

Speaker Location in:

Dallas, TX

Benign Anorectal Conditions

LEARNING OBJECTIVES

- Understand work up and management for anal fissure
- Understand work up and management of hemorrhoids
- Understand work up and management for anorectal abscess

Speaker Location in:

Salt Lake City, UT

Beyond the Breasts: Body Contouring in the Context of Breast Reconstruction

LEARNING OBJECTIVES

- The participant will learn about current shortcomings in autologous breast reconstruction aesthetics
- The participant will learn about strategies to optimize aesthetic outcomes in reconstructive breast surgery
- The participant will learn about the evolution of reconstructive options after mastectomy

Speaker Location in:

Great Neck, NY

Break Free from Death by PowerPoint: Principles of Effective Presentation

LEARNING OBJECTIVES

- Compare active versus passive learning
- Explain dual channel processing theory
- Be critical of our own presentation style and apply cognitive principles to maximize learning

Speaker Location in:

Huntington, NY

Breaking the Cycle of Violence Utilizing Community— Based Organizations

LEARNING OBJECTIVES

- Understand the risk factors for international injury
- Understand the role of community-based organizations in addressing these risk factors
- How to grow your own hospital-based violence intervention program

Speaker Location in:

Chicago, Illinois

Breast Conversation Surgery by General Surgeons: Feasibility Study

LEARNING OBJECTIVES

- Breast conversation surgery
- Oncoplasty
- Breast cancer treatment

Speaker Location in

Kolkata, West Bengal

[Bridging Biological Advances with Technological Innovation in Robotic Surgery](#)

LEARNING OBJECTIVES

- Frugal innovation for a surgeon
- Developing your own innovation plan
- Research as a career path

Speaker Location in:

Bangalore, Karnataka

Building a Multidisciplinary Limb Salvage Team

LEARNING OBJECTIVES

- Describe the composition of a multidisciplinary limb salvage team
- Describe how implementation of a multidisciplinary limb salvage team can improve outcomes
- Discuss the financial considerations to starting and maintaining a multidisciplinary limb salvage team

Speaker Location in:

Baltimore, MA

Building a Scarless Thyroid Program

LEARNING OBJECTIVES

- Learn how to introduce a new technique to your institution
- Learn the benefits and risks of scarless thyroidectomy
- Recognize and overcome barriers to new techniques as a new attending

Speaker Location in:

Fresno, CA

Burnout, Wellness, Resilience and Grit in Surgery

LEARNING OBJECTIVES

- Understand personal and institutional impact of burnout
- Learn how to foster resilience and wellness during residency and later in your career
- Analyze how to decrease burnout at your institution

Speaker Location in:

Boston, MA

Can Standardization of the Gastric Sleeve be Achieved with Robotic Surgery?

LEARNING OBJECTIVES

- Discuss standardization tenets of bariatric gastric sleeve procedures
- Understand advances in robotic surgery technology
- Discuss implications for standardization of bariatric procedures with robotic intelligent technology

Speaker Location in:

Atlanta, GA

Cardiac Transplantation - Challenges and Opportunities

LEARNING OBJECTIVES

- Understand the challenges facing heart transplantation today
- Understand the opportunities facing heart transplantation
- Understand what cardiologists and surgeons can do to perform more heart transplants

Speaker Location in:

Fort Wayne, IN

Challenges and New Paradigms in the Care of Gastroesophageal Cancers

LEARNING OBJECTIVES

- Understanding new technologies for management of gastric and esophageal cancer
- Understanding the pros and cons of minimally invasive and robotic approaches from this disease
- Understanding molecular-based therapies for upper GI cancer

Speaker Location in:

Tampa, FL

Challenges and Post-Operative Issues in IBD-Related Surgery

LEARNING OBJECTIVES

- Describe indications for surgery for IBD
- Understand critical pre, intra and post-operative issues related to IBD surgery
- Understand how medical therapy impacts pre/intraoperative decision making

Speaker Location in:

Tampa, FL

Climate Change Begins at 7:15: Our Unsustainable Future in the OR

LEARNING OBJECTIVES

- Discuss the climate science
- Prompt action to mitigate climate change in the healthcare sector
- Identify local effects and promote change in our ORs

Speaker Location in:

Los Angeles, CA

Clinical and Economic Burden of Diabetic Limb Salvage in a Multi-Ethnic Cohort from the Tropics

LEARNING OBJECTIVES

- Multi-disciplinary approach to diabetic limb salvage
- Health systems innovation within the healthcare cluster
- Health economics analysis of diabetic limb salvage

Speaker Location in:

Singapore, Singapore

Clinical Research: From Hypothesis to Manuscript

LEARNING OBJECTIVES

- Develop skills to implement a meaningful clinical research study
- Understand the common fallacies in design and analysis of clinical research studies
- Develop skills to translate a clinical question to a publishable manuscript

Speaker Location in:

Seattle, WA

Clinical Updates in Cytoreductive Surgery and HIPEC for Peritoneal Metastases

LEARNING OBJECTIVES

- To understand literature on the role of CRS/HIPEC in colorectal cancer with peritoneal metastases
- To understand literature on the role of CRS/HIPEC in ovarian cancer with peritoneal metastases
- To understand literature on the role of CRS/HIPEC in gastric cancer with peritoneal metastases

Speaker Location in:

Chicago, IL

Colorectal Cancer Emergencies

LEARNING OBJECTIVES

- Understand three main objectives of emergencies with colorectal cancer
- Understand ways to treat emergencies of the right side of colon
- Understand ways to treat emergencies of left colon and rectum

Speaker Location in:

Iowa City, IA

Common Plastic Surgery Emergencies

LEARNING OBJECTIVES

- To learn about the breadth of plastic and reconstructive surgery
- To understand how to treat common hand injuries
- To understand treatment of chemical and electrical burn injuries

Speaker Location in:

Irvine, CA

Contemporary Management of DCIS

LEARNING OBJECTIVES

- Standard of care management guidelines for DCIS
- Available clinical trials to consider in DCIS management
- Appropriate margin status at surgical excision and who benefits from radiation

Speaker Location in:

Kansas City, KS

Contemporary Sleep Apnea Surgery: Addressing Missed Milestones in Facial and Airway Development

LEARNING OBJECTIVES

- Understand how surgery and the change in upper airway structure can improve the pathophysiology of obstructive sleep apnea
- Learn about the development and current best surgical algorithm in the approach to obstructive sleep apnea
- Learn of diversified surgical techniques including endoscopic surgery, virtual surgical planning, hypoglossal nerve stimulation, and maxillofacial surgery for obstructive sleep apnea

Speaker Location in:

Stanford, CA

Contemporary Three-Dimensional Planning in Craniofacial Surgery

LEARNING OBJECTIVES

- Discuss the evolution of three-dimensional planning in craniofacial surgery
- Review the workflow process and implementation of three-dimensional plans in operating room
- Review the available evidence regarding three-dimensional planning for craniofacial reconstructive

Speaker Location in:

Seattle, WA

Controversies in Adrenal Surgery

LEARNING OBJECTIVES

- Minimally invasive adrenalectomy can be safely performed on an outpatient basis in select patients
- More aggressive screening is needed for primary hyperaldosteronism
- Subclinical Cushing's Syndrome patients have improvements in metabolic syndrome following adrenalectomy

Speaker Location in:

Birmingham, AL

Core Medicine: Why I Chose A Specialty That Didn't Exist

LEARNING OBJECTIVES

- Understand the anatomy of core muscle injuries (and why the term sports hernia is misleading)
- Appreciate the potential for innovation between the silos of surgical specialties
- Develop a basic understanding of how to diagnose and treat core injuries

Speaker Location in:

Philadelphia, PA

COVID, Cancer, and Cardiac Disease

LEARNING OBJECTIVES

- Understand the most common causes of death
- Learn the impact of COVID 19 on cancer screenings and cardiac disease
- Discuss current and future ramifications due to COVID 19

Speaker Location in:

Springfield, OH

Cranial, Subcranial, and Orthognathic Surgery for Obstructive Sleep Apnea

LEARNING OBJECTIVES

- Describe the pathophysiology of obstructive sleep apnea in the context of facial skeletal dysplasia
- Describe the different facial skeletal osteotomies used to address construction of the facial skeleton
- Discuss the choice of surgical intervention as a function of patient age

Speaker Location in:

Seattle, WA

Cultivating Well-being: A Constant Challenge

LEARNING OBJECTIVES

- Describe how scarcity and shame can negatively impact well-being
- Discuss job crafting as a strategy to promote well-being
- Discuss gratitude practice as a strategy to promote well-being

Speaker Location in:

Birmingham, AL

Current Controversies in Urethral Stricture Management

LEARNING OBJECTIVES

- Describe how to evaluate a urethral stricture
- Describe surgical options for managing urethral stricture
- Describe management of a pelvic fracture urethral injury

Speaker Location in:

Austin, TX

Decision-Making and Risk Attitudes in Thyroid Cancer

LEARNING OBJECTIVES

- How do perceptions of risk affect physician decision making?
- How much do risk perceptions explain variation in treatment recommendations?
- How patient preferences interacts with physician risk attitude and risk perception

Speaker Location in:

Los Angeles, CA

Demystifying Pelvic Pain: Where to Start

LEARNING OBJECTIVES

- The definition and differential diagnosis of chronic pelvic pain
- Basic steps of office evaluation of chronic pelvic pain
- Initiation of care

Speaker Location in:

Greenville, SC

Devil's In the Details: Roux en Y Gastric Bypass: Optimal Intestinal Limb Length

LEARNING OBJECTIVES

- Review difference between proximal and distal gastric bypass
- Review how to best measure intestinal limb length
- Understand the nuances among the roux, HPB and common limbs

Speaker Location in:

Rockland, DE

Devil's In the Details: Running a Practice: Building a Program

LEARNING OBJECTIVES

- To determine the groundwork to bring the program concept to leadership
- Review the components of pro forma
- Creating methods to build successful programs

Speaker Location in:

Rockland, DE

Diagnosis and Treatment of Venous Thoracic Outlet Syndrome

LEARNING OBJECTIVES

- Understanding the pathophysiology of vTOS
- Assessing best approach to treat vTOS
- Gauging long term results of vTOS

Speaker Location in:

Denver, CO

Digitalized Surgery- Leveraging Intraoperative Data and Insight to Enhance Surgical Quality

LEARNING OBJECTIVES

- Role of data capture in surgical quality
- Understand the role of AI in medicine and surgery
- Defining surgical quality in real time

Speaker Location in:

Las Vegas, NV

Disparities in Breast Cancer Care

LEARNING OBJECTIVES

- Identify existing disparities in breast cancer care
- Discuss issues with traditional approaches to understanding disparities
- Review possible solutions to remedy disparities in breast cancer care

Speaker Location in:

Omaha, NE

Dress for Success

LEARNING OBJECTIVES

- Explore basic leadership principles
- Discuss executive presence
- Explore the case for networking and how to do it

Speaker Location in:

Indianapolis, IN

Ear Anatomy for Non-ENTs

LEARNING OBJECTIVES

- Tips and pearls for best method of examining any patient's ear
- Review external anatomy of common pathologies with endoscopic and microscopic views
- Introduce internal ear anatomy with clinical implications

Speaker Location in:

New Orleans, LA

Early Detection of Prostate Cancer: Markers, Imaging, and Biopsy Strategies

LEARNING OBJECTIVES

- Use of biomarkers for prostate cancer screening
- Imaging used for prostate cancer diagnosis
- Understand different biopsy strategies

Speaker Location in:

Springfield, IL

East Surgical Ward Enteric Perforation Score: A New Statistically Valid Scoring Criteria for Decision Between Repair or Ileo in Patients with Peritonitis due to Enteric Perforation

LEARNING OBJECTIVES

- To simplify decision between repair and stoma information
- To simplify decision between repair and stoma information
- To simplify decision between repair and stoma information

Speaker Location in:

Lahore, Punjab

[ECMO for COVID-19: 10 Lessons Learned...The Hard Way](#)

LEARNING OBJECTIVES

- Review the typical and atypical uses of extracorporeal support for COVID-19
- Recognize the unique challenges to using ECMO during a pandemic
- Identify how clinical practice adapted over the course of 2020

Speaker Location in:

Dallas, TX

Endometriosis

LEARNING OBJECTIVES

- Identify endometriosis in intra-operative setting
- Management of endometriosis for short- and long-term
- Surgical management of endometriosis

Speaker Location in:

New York, NY

Enhances Recovery After Surgery in Gynecology

LEARNING OBJECTIVES

- Understand ERAS principals
- Implement ERAS in your own practice
- Reduce your surgical footprint

Speaker Location in:

Los Angeles, CA

Entrustable Professional Activities: Practical Competency-Based Education or Just the Next Fad?

LEARNING OBJECTIVES

- Describe challenges in physician assessment and the relationship to preparedness of unsupervised practice
- Define Entrustable Professional Activities and their relationship to competencies and milestones
- Understand how Entrustable Professional Activities are one way to implement competency-based education

Speaker Location in:

Birmingham, AL

Epidemiology of Papillary Carcinoma Thyroid in Southeast Asia and India

LEARNING OBJECTIVES

- Epidemiology of Papillary thyroid cancers
- Changing patterns in epidemiology
- Future patterns and predictions

Speaker Location in:

Chandigarh, India

Establishing an NAPRC Accredited Program

LEARNING OBJECTIVES

- Understand NAPRC Standards
- Process improvements to achieve MDT collaboration
- Standard patient care pathways to achieve compliance with accreditation standard

Speaker Location in:

Des Moines, IA

Ethics in Surgery Training

LEARNING OBJECTIVES

- Understand fundamental ethical consideration in surgery training
- Learn systems in place to safeguard patients
- Gain teaching skills

Speaker Location in:

Boston, MA

[BACK: Search by Location](#)

[BACK: Search by Topic](#)

Ethnic Disparities in Weight Loss Surgeries and Practical Strategies to Eliminating Disparities

LEARNING OBJECTIVES

- Discuss the prevalence of obesity in ethnic groups
- Understand barriers to equitable treatment of obesity
- Discuss practical strategies to eliminate disparities in treatment

Speaker Location in:

Atlanta, GA

[BACK: Search by Location](#)

[BACK: Search by Topic](#)

Evaluation and Management of Metastatic Colorectal Cancer

LEARNING OBJECTIVES

- Understand different types of metastases of colorectal cancer
- Understand types of treatments for colorectal cancer metastases
- Understand types of treatment for primary tumor in the setting of metastases

Speaker Location in:

Iowa City, IA

Evolution of Aortic Surgery: New Techniques and Technology

LEARNING OBJECTIVES

- How has aortic surgery evolved in last 7 decades
- Evolving management of acute and chronic aortic pathologies
- Future technology for management of aortic surgery

Speaker Location in:

Norfolk, VA

Experiences with Allergic Fungal Rhino Sinusitis

LEARNING OBJECTIVES

- Management of Allergic fungal sinusitis
- Rare forms of presentation
- Post-op care, follow up and future research

Speaker Location in:

Chandigarh, India

Experiences with Laryngotracheal Surgery

LEARNING OBJECTIVES

- Presentation of laryngotracheal trauma and stenosis
- Management principles
- Outcome and practice essentials

Speaker Location in:

Chandigarh, India

Exposure of Superior Mesenteric Artery for Acute Mesenteric Ischemia

LEARNING OBJECTIVES

- Technical approach to open exposure of superior mesenteric artery in acute abdomen
- Learn about the development and current best surgical algorithm in the approach to obstructive sleep apnea
- Learn of diversified surgical techniques including endoscopic surgery, virtual surgical planning, hypoglossal nerve stimulation, and maxillofacial surgery for obstructive sleep apnea

Speaker Location in:

Charlottesville, VA

Extracorporeal Membrane Oxygenation: Nuts and Bolts

LEARNING OBJECTIVES

- Establish a foundation for the utility of extracorporeal support
- Review cannulation strategies for ECMO
- Understand critical care management of patients on ECMO

Speaker Location in:

Dallas, TX

Facial Skeletal Surgery in Patients with Craniofacial Anomalies

LEARNING OBJECTIVES

- Describe the characteristics of facial skeletal differences amenable to orthognathic correction
- Understand the specific considerations for performing facial surgery in patients with craniofacial anomalies
- Understand the role that facial skeletal surgery plays in the contemporary management of upper-airway obstruction

Speaker Location in:

Seattle, WA

Financial Planning for Surgical Residents

LEARNING OBJECTIVES

- Help surgery residents have a healthy financial plan in place during residency
- Describe to residents the need for various insurance options for their career
- Give residents the tools to build a broad financial knowledge base so they are able to start saving for retirement early in their career

Speaker Location in:

Detroit, MI

Five Controversies in Urethral Stricture Management: Evidence to Practice

LEARNING OBJECTIVES

- Describe the workup and diagnosis of urethral stricture
- Understand common surgical principles of urethroplasty and the evidence behind them
- Understand the use of flaps and grafts in urethral reconstruction

Speaker Location in:

Austin, TX

Frontiers in Endometriosis Treatment

LEARNING OBJECTIVES

- Discuss the current origin theories of endometriosis and separate endometriosis into different phenotypes
- Treat chronic pelvic pain as a separate but complimentary disease state
- Review active surveillance of low-risk thyroid cancers and opportunities for less aggressive surgery

Speaker Location in:

Los Angeles, CA

Gallbladder Perforation Management and Prognosis

LEARNING OBJECTIVES

- Evidence-based decisions
- Laparoscopy vs Open approach
- Complications

Speaker Location in:

Monterrey, Nuevo Leon

Gender Barriers in Surgery

LEARNING OBJECTIVES

- Discuss availability issues women face in surgery
- Explore gender barriers in operating room
- Look at challenges women surgeons can overcome to help other women in surgery

Speaker Location in:

Kuwait, Kuwait

Global Academic Surgery-Surgical Education of "Haves and Have Nots"

LEARNING OBJECTIVES

- To describe the status of surgical education in low middle income countries
- To compare surgical education in LIC/LMICS with HICS
- To describe areas for improvement in global academic surgery

Speaker Location in:

Kathmadu, Bagmati

[Harnessing the Potential of Macrophages in Human Cancer: Reflections of an Early-Stage Surgeon Scientist](#)

LEARNING OBJECTIVES

- Describe the pro-and anti-tumor roles of macrophages in human cancer
- Identify current gaps in cancer research
- Identify key challenges that basic/translational surgeons-scientists face and why it matters

Speaker Location in:

Seattle, WA

[BACK: Search by Location](#)

[BACK: Search by Topic](#)

Head Neck Surgery

LEARNING OBJECTIVES

- Head Neck Cancer
- Thyroid Neoplasm
- Neck Dissection

Speaker Location in:

Berhampore, Wet Bengal

Heart Failure and Valvular Heart Disease

LEARNING OBJECTIVES

- Understand etiology and prevention of heart failure
- Understand interplay of Valvular Heart Disease (VHD) and heart failure
- Discuss treatment of VHD and heart failure

Speaker Location in:

Springfield, OH

Hereditary Diffuse Gastric Cancer Due to CDH1

LEARNING OBJECTIVES

- Understand the subtypes of gastric adenocarcinoma
- Identify the molecular changes associated with subtypes of gastric adenocarcinoma
- Describe the treatment recommendations for patients with CDH1 germline mutations

Speaker Location in:

Bethesda, MD

High-Stakes Exams: The Greatest Story Never Told

LEARNING OBJECTIVES

- Understand the history of multiple choice (high-stakes) exams
- Understand the limitations of multiple choice (high-stakes) exams
- Consider alternatives to multiple choice (high-stakes) exams as currently used in medical and surgical education

Speaker Location in:

Aurora, CO

History of Heart Transplantation

LEARNING OBJECTIVES

- Learn the history of heart transplant
- Learn the development of the listing statuses of heart transplant
- Development of immunosuppression for heart transplant

Speaker Location in:

Fort Wayne, IN

Homogenous Goals + Variant Background=Improved Outcomes

LEARNING OBJECTIVES

- To increase awareness of lack of diversity in transplant surgery and in medicine as a whole
- To give tools for increasing diversity and show improved outcomes data

Speaker Location in:

Upland, PA

How the Cognitive Theory of Education Can Make Us more Efficient, Efficacious, and Engaging Instructors

LEARNING OBJECTIVES

- Describe briefly the concepts of cognitive-load theory, deliberate practice, and zone of proximal development as it pertains to medical and surgical education
- Analyze current teaching environment and how it intercedes with these theories
- Critique current teaching practices to apply theory to practice in every day educational experiences

Speaker Location in:

Huntington, NY

How to be a Clinical Influencer on Social Media in the Word Where Everyone is an Expert

LEARNING OBJECTIVES

- To show how to effectively influence Minority Populations Using Social Media

Speaker Location in:

Upland, PA

How to Build a Successful Plastic and Reconstructive Surgical Practice: Transitioning Between Academic and Private Practice

LEARNING OBJECTIVES

- To learn economics and finances of academic and private practices
- To elucidate details regarding contract negotiations and reimbursements
- To provide clear and definitive guidelines to be a successful surgeon in academic and private practice

Speaker Location in:

Shrewsbury, NJ

How to Develop a Thriving Surgical Practice

LEARNING OBJECTIVES

- How to pick a geographical place to practice
- How to make your practice to grow
- When and how to decide to increase your market share

Speaker Location in:

Danville, PA

How to Do an Outcomes Research Project

LEARNING OBJECTIVES

- Choosing the right practice model for you after surgical training
- Provide insight into the stepwise breakdown of an outcomes project
- Discuss strategies to optimize success in completing an outcomes project

Speaker Location in:

Baltimore, MD

How to Recruit and Retain More Women in HPB Surgery

LEARNING OBJECTIVES

- Educate about disparities in experience and treatment of under-represented surgical faculty and learners
- Share the importance of diversity in institutional populations and thinking
- Offer real-world, immediately employable behavior change that can help attendees support under-represented colleagues and students

Speaker Location in:

Duarte, CA

How to Set Up a 24/7 Robotic Program and What is the Impact on Acute Care Surgery?

LEARNING OBJECTIVES

- Role of robotic surgery in Acute Care Surgery
- Impact of time of the day on success on robotic surgery

Speaker Location in:

Galveston, TX

Hyper-intense Conversation in the Emergency Setting

LEARNING OBJECTIVES

- Analyze unique challenges for breaking bad news in the emergency settings
- Develop the capacity of curiosity and words that can enable it during conversations with patients
- Learn how to respond to emotions after breaking bad news

Speaker Location in:

Boston, MA

Iliac Venous Interventions in Asians

LEARNING OBJECTIVES

- Iliac venous interventions (IVUS and Stenting)
- Chronic venous insufficiency and venous leg ulcers
- Deep vein thrombosis and post-thrombotic syndrome

Speaker Location in:

Singapore, Singapore

Improving Trauma Systems of Care

LEARNING OBJECTIVES

- Understand history of development of US cancer management
- Understand shortcomings of existing US trauma system
- Identify opportunities to improve US trauma system

Speaker Location in:

Chicago, IL

Inclusive Mentorship and Sponsorship

LEARNING OBJECTIVES

- Describe the role and responsibilities of a mentor
- Describe the role and responsibilities of a sponsor
- Identify strategies for inclusive mentorship/sponsorship

Speaker Location in:

Brooklyn, NY

Innovation and Commercialization for Residents and Surgeons

LEARNING OBJECTIVES

- Identify opportunities appropriate for commercialization vs research
- Present examples of successful surgeon innovators and the steps to commercialization
- Characterize role and pitfalls for surgeons who choose to start a company

Speaker Location in:

Boston, MA

Innovation in Medical Education in a Resource-Limited Set Up

LEARNING OBJECTIVES

- Innovation in teaching learning during lockdown
- How to develop low-cost simulation to teach clinical skills maintaining COVID appropriate behavior
- How to evaluate medical maintaining COVID appropriate behavior

Speaker Location in:

Bhubaneswar, Odisha

Innovation Surgical Approaches to the “No-Option” Patient with Critical Limb Ischemia

LEARNING OBJECTIVES

- Detail who is the "no-option" limb ischemia patient
- Discuss practical methods to salvage a diabetic limb
- Detail novel wound healing strategies for limb salvage

Speaker Location in:

Boston, MA

Intraoperative Nerve Monitoring in Neck Endocrine Surgery

LEARNING OBJECTIVES

- To understand the rationale for intermittent and continuous intraoperative nerve monitoring in neck endocrine surgery
- To discuss the different techniques for monitoring including their advantages and disadvantages
- To examine the evidence for nuro monitoring in neck endocrine surgery

Speaker Location in:

New York, NY

Intraoperative Radiation Therapy (IORT) for Breast Cancer

LEARNING OBJECTIVES

- Describe RCT data which exists regarding IORT treatment in breast cancer
- Describe which patients may be good candidate for IORT for breast cancer
- Describe advantages and disadvantages of IORT and EBRT for breast cancer

Speaker Location in:

Kansas City, KS

Knife at the Gunfight: Surgeons ‘Work Against Gun Violence

LEARNING OBJECTIVES

- Identify effective gun violence prevention strategies
- Familiarize audience with existing literature on gun violence prevention
- Recognize the importance role of trauma surgeons in violence prevention

Speaker Location in:

Brooklyn, NY

Laparoscopic Anatomy of Groin Hernia

LEARNING OBJECTIVES

- Anatomy for TEP
- Anatomy for TAPP
- Endoscopic hernia repair

Speaker Location in:

Bangalore, India

Laparoscopic Common Bile Duct Exploration: Rediscovering our Surgical Heritage

LEARNING OBJECTIVES

- Describe the historical evolution of common bile duct stone management
- Describe patient selection and surgical techniques for surgical management of CBD stones
- Describe simulation-based modalities for surgeons to learn CBD exploration

Speaker Location in:

Lebanon, NH

Laparoscopic Gastrectomy for Gastric Cancer

LEARNING OBJECTIVES

- Laparoscopic anatomy
- Surgical Margines
- Anastomos technique

Speaker Location in:

Baku, Azerbaijan

Laparoscopic Gastrectomy with ICG

LEARNING OBJECTIVES

- Laparoscopic gastrectomy techniques and using icg
- Dissection of LN
- Is ICG useful?

Speaker Location in:

Baku, Azerbaijan

Learning Physician Advocacy

LEARNING OBJECTIVES

- How to engage in advocacy at the state and national level
- Resources for physicians interested in healthcare policy and advocacy
- Example of successful advocacy

Speaker Location in:

Ann Arbor, MI

Lessons Learned from the Pandemic: Telehealth

LEARNING OBJECTIVES

- To discuss the medicolegal structure of Telehealth
- Review key components of successful use of Telehealth
- How to physically set up your office for Telehealth

Speaker Location in:

Rockland, DE

Let's Start Talking About Lung Cancer!

LEARNING OBJECTIVES

- How common is lung cancer
- Lung cancer screening
- Advanced treatment and diagnostic options

Speaker Location in:

Springfield, OH

Level 2 Surgeries in Sleep Apnea

LEARNING OBJECTIVES

- Description of level-two surgical techniques in sleep apnea treatment
- Correct selection of surgical technique for each case
- Surgical outcomes and comparison of results in relation to non-surgical therapies

Speaker Location in:

Buenos Aires, Argentina

Management of Axillary Surgery in Breast Cancer

LEARNING OBJECTIVES

- Understand indications of lymph node dissection
- Learn the clinical trails that lead to the current standard of care
- Learn about the current active clinical trials of axillary surgery for breast cancer

Speaker Location in:

Winston-Salem, NC

Management of Early HCC

LEARNING OBJECTIVES

- Understand historical ablation data vs current technology
- Understand oncologic outcomes of ablation vs resection
- Understand evolution of guidelines

Speaker Location in:

Rochester, MN

Management of Endometriosis: Where Are We Now

LEARNING OBJECTIVES

- Understand the pathophysiology, characterization, and current research in endometriosis
- How to evaluate and manage a patient with suspected endometriosis, and review medical operative options
- Postoperative and long-term management concern

Speaker Location in:

Greenville, SC

Management of Esophageal Perforation

LEARNING OBJECTIVES

- Review presentation, sign and symptoms of esophageal perforation
- Understand differing treatment paradigms for early vs late presentation
- Understand steps for different surgical interventions for esophageal perforation

Speaker Location in:

Lebanon, NH

Management of Hereditary Endocrine Neoplasms

LEARNING OBJECTIVES

- Recognize clinical characteristics of most common hereditary endocrine neoplasms
- Recognize most common gene mutations associated with hereditary endocrine neoplasms
- Identify conditions that may warrant genetic counseling and testing

Speaker Location in:

Brooklyn, NY

Management of High-Risk Breast Cancer Patients

LEARNING OBJECTIVES

- Identification and definition of high-risk patients
- Recommended screening
- Risk reduction options including chemoprevention and prophylactic mastectomy

Speaker Location in:

Winston Salem, NC

Management of Incidental Adrenal Nodules

LEARNING OBJECTIVES

- Describe increasing prevalence of conditions that warrant adrenalectomy (hyperaldosteronism, subclinical, subclinical Cushing's syndrome)
- Compare and contrast minimally invasive approaches to adrenalectomy
- Evaluate evidence for outpatient adrenalectomy as a safe perioperative strategy

Speaker Location in

Birmingham, AL

Management of Pediatric Craniomaxillofacial Trauma

LEARNING OBJECTIVES

- Review the epidemiology of facial injuries in children
- Discuss the anatomical differences in children that result in unique injury patterns
- Discuss management of craniomaxillofacial fractures in growing children

Speaker Location in:

Seattle, WA

Management of Penetrating Vascular Trauma in An Austere Environment

LEARNING OBJECTIVES

- Basic principles of management of extreme vascular trauma
- Introduction to general surgeons regarding vascular trauma
- Illustration of loopholes and controversies

Speaker Location in:

New Delhi, Delhi

Management of Peripheral Artery Disease in the Diabetic Patient: A Team Approach

LEARNING OBJECTIVES

- Understand the implications of elevated blood glucose levels in the patient with peripheral artery disease
- Diagnose and medically manage symptoms of peripheral artery disease in a diabetic patient
- Understand when to obtain vascular surgery evaluations on patients with diabetes

Speaker Location in:

Philadelphia, PA

Management of the Axilla in the Treatment of Breast Cancer

LEARNING OBJECTIVES

- Understand history of axillary surgery in breast cancer treatment
- Understand indications for SLNB and ALND
- Understand how to manage the axillary following neoadjuvant chemotherapy

Speaker Location in:

Philadelphia, PA

Margins in Breast Cancer: How Much is Enough?

LEARNING OBJECTIVES

- Understand margin requirements in breast cancer
- Learn techniques to decrease positive margin
- Understand differences in invasive cancer vs DCIS

Speaker Location in:

Winston-Salem, NC

Massive Resuscitation in Trauma: Back to the Future

LEARNING OBJECTIVES

- Understand history of massive blood product resuscitation in trauma
- Discuss the use of whole blood in trauma resuscitation
- Identify current ideal components of massive trauma resuscitation

Speaker Location in:

Birmingham, AL

Maximizing the Potential of Your Mentorship Relationship

LEARNING OBJECTIVES

- Understand the phases of mentoring
- Develop a mentor team and individual development plan
- Effective use of a mentoring mosaic

Speaker Location in:

Atlanta, GA

Metabolic & Bariatric Surgery and the Management of Diabetes

LEARNING OBJECTIVES

- How metabolic surgery improves diabetes
- Surgical options for diabetes management
- Metabolic affects of bariatric surgery

Speaker Location in:

Columbia, MO

Minimally Invasive Colorectal Surgery

LEARNING OBJECTIVES

- Understand the role of minimally invasive approach in colorectal surgery
- Understand the outcomes of minimally invasive colorectal surgery
- Recognize the benefits of minimally invasive colorectal surgery

Speaker Location in:

Newark, NJ

Minimally Invasive Percutaneous Pedicle Screw Fixation for Selective Traumatic Thorcolumbat Spine Fractures

LEARNING OBJECTIVES

- To highlight the importance of Minimally Invasive Spine Surgery(MISS) in comparison to conventional open spine surgery
- Indications of Minimally Invasive Spine Surgery in trauma of thoracolumbar spine
- Advantages of Minimally Invasive Spine Surgery

Speaker Location in:

Jubail, Jubail

Modern Approaches to Oropharyngeal Cancer Management

LEARNING OBJECTIVES

- Discuss modern approaches to diagnosis of oropharyngeal cancer
- Demonstrate robotic approaches to oropharyngeal cancer
- Discuss functional and survival outcomes for oropharyngeal cancer

Speaker Location in:

Chicago, IL

Morbid Obesity: A Real Epidemic

LEARNING OBJECTIVES

- National statistics on obesity
- Options to treat obesity
- Insurance requirements for bariatric surgery

Speaker Location in:

Monongahela, PA

Multidimensional Care of Transgender Patients: An Introduction for the Otolaryngologist

LEARNING OBJECTIVES

- Learn terminology and evidence-based approaches to creating affirming practices for patients of all gender identities
- Understand the indications for thyroid cartilage laryngochondroplasty (Adam's apple reduction) and facial gender-affirming surgeries
- Describe anatomy, become familiar with approaches and pitfalls related to pitch-altering phonosurgery, and understand the role of gender voice and communication therapy

Speaker Location in:

Madison, WI

Multidisciplinary Management of Soft Tissue Sarcoma

LEARNING OBJECTIVES

- Understand the role of appropriate diagnostic techniques for STS
- Understand the sequence of multi-modal therapy for advanced disease
- Understand the role of surgical resection in metastatic disease

Speaker Location in:

Tampa, FL

My Experience with Military Medicine

LEARNING OBJECTIVES

- Discuss military training
- Pros and cons of military practice for those considering service
- Q & A

Speaker Location in:

Cleveland, OH

Navigating a Surgical Career

LEARNING OBJECTIVES

- Identify different pathways for a surgical career
- Identify different types of 'procedure-based' residencies
- Identify difference between residency and fellowship

Speaker Location in:

Columbus, OH

[Necrotizing Pancreatitis: Importance of Surgeons Involvement in Multidisciplinary Care and Step-Up Approach](#)

LEARNING OBJECTIVES

- Natural history and prognosis of pancreatitis
- Historical context of surgical management - the VARD
- Role of multidisciplinary team approach

Speaker Location in:

San Diego, CA

Necrotizing Soft Tissue Infection

LEARNING OBJECTIVES

- Define the pathophysiology
- Elucidate initial management concepts
- Review post operative management strategies

Speaker Location in:

New York, NY

Negotiation and Conflict Management: Essential Tools for Young Surgeons

LEARNING OBJECTIVES

- Discuss how traditional "soft skills" are important in the practice of medicine
- Explore the principles of negotiation and conflict management
- Apply negotiation skills to get things done in practice

Speaker Location in:

Indianapolis, IN

Neoadjuvant Therapies for Resectable Advanced Melanoma: Is it Ready for Primetime?

LEARNING OBJECTIVES

- Understand the impact of systemic therapies on the surgical management of regionally advanced disease
- Develop an algorithm for which patients should undergo neoadjuvant therapy for melanoma
- Describe ongoing research in the field of neoadjuvant therapies in melanoma

Speaker Location in:

Atlanta, GA

Neoadjuvant Therapy For Upper Gastrointestinal Malignancies

LEARNING OBJECTIVES

- Understanding the difference therapeutic options for neoadjuvant treatment of gastric and esophageal tumors
- Understanding the decision-making process when deciding to start neoadjuvant therapy
- Understanding the impact in surgical outcomes of those therapies

Speaker Location in:

Tampa, FL

Nipple-Sparing Mastectomy

LEARNING OBJECTIVES

- Understand onocologist safety of nipple-sparing mastectomy
- Understand indications and contraindications of nipple-sparing mastectomy
- Learn the technical aspect of the procedure

Speaker Location in:

Winston Salem, NC

Novel Vascular Surgical Frontiers: Thrombosis and Regeneration of the Microvascular Network in Wound Healing

LEARNING OBJECTIVES

- To delineate innovative technology to predict infection
- To detail personalized approaches to infection predication
- To discuss advances in surgical infection care

Speaker Location in:

Boston, MA

Nutrition Considerations in Patients with Chylous Ascites/Leak

LEARNING OBJECTIVES

- Understanding pathophysiology of Chyle Ascites
- Understanding the classification and management for Chyle Ascites
- Understanding the nutrition impact of Chylous Ascites/Leak in the Oncologic Cancer

Speaker Location in:

Tampa, FL

Office-Based Surgery in Laryngology (Voice, Airway, and Swallowing)

LEARNING OBJECTIVES

- Learn what diseases or procedures are appropriate
- Learn how to locally anesthetize patients prior to surgery
- Learn procedural details and how to manage complications in awake office-based surgery

Speaker Location in:

Dallas, TX

Oncolytic Viral Therapy for Solid Tumors: Where Have We Been and Where Are We Going?

LEARNING OBJECTIVES

- Introduce theory and categories of oncolytic viral treatment
- Review current clinical data supporting use of viro-immunotherapy
- Introduce future directions of study for viral therapy

Speaker Location in:

Duarte, CA

Oncolytic Viruses and the Importance of Surgeon Scientists

LEARNING OBJECTIVES

- Understand utility of oncolytic viruses
- Understand process for bench-to-bedside
- Understand necessity for surgeon scientists and routes to success

Speaker Location in:

Rochester, MN

Oncoplastic Breast Surgery for the General Surgeon

LEARNING OBJECTIVES

- Define level I and level II oncoplastic breast surgery
- Understand incision placement for optimal cosmetic outcomes in breast conservation
- Review oncologic safety of oncoplastic approaches to breast conservation

Speaker Location in:

Omaha, NE

Operating Room Efficiency

LEARNING OBJECTIVES

- Operating room efficiency
- Enabling technologies
- Working as a team

Speaker Location in:

Jackson, MI

Opioid Stewardship in the ICU

LEARNING OBJECTIVES

- Recognize the underlying causes of the second opioid epidemic in the US
- Cite the current SCCM recommendations for opioid use in the ICU
- Identify novel strategies for minimizing opioid use in critically ill patients

Speaker Location in:

Cleveland, OH

Oral Cancer in Young Patients and the Role of HPV

LEARNING OBJECTIVES

- Discuss the pathophysiology of HPV infection
- Explore the increasing trend of oral cancer in young patients
- Learn the current evidence to support HPV vaccination

Speaker Location in:

Dallas, TX

Orthognathic Surgery

LEARNING OBJECTIVES

- Learn what orthognathic surgery is and who would benefit from it
- Review common procedures in orthognathic surgery
- Treatment of nonmetastatic castrate resistant disease

Speaker Location in:

Boston, MA

Osteopathic Considerations for Surgical Patients

LEARNING OBJECTIVES

- Describe the up-to-date evidence base for osteopathic manipulative treatment for surgical patients
- Identify opportunities to improve patient outcomes by integrating osteopathic manipulative treatment with standard surgical care
- Support use and further study of osteopathic manipulative treatment in the acute hospital setting

Speaker Location in:

Mineloa, NY

Osteonecrosis and Osteoradionecrosis of the Jaws

LEARNING OBJECTIVES

- To develop an understanding of the pathophysiology of osteonecrosis and osteoradionecrosis of the jaws
- To better appreciate the nuances of diagnosis and prevention of osteonecrosis and osteoradionecrosis
- To gain insight into the treatment options available and the expected clinical course of disease

Speaker Location in:

Dallas, TX

Osteonecrosis of Jaws: What have We learned in the Last 19 Years

LEARNING OBJECTIVES

- Describe the staging of osteonecrosis of the jaws
- Describe the pathophysiology and current theories on the development of osteonecrosis of the jaws
- Learn the current treatment approaches and expected outcomes

Speaker Location in:

Dallas, TX

Overdiagnosis and Overtreatment of Thyroid Cancer

LEARNING OBJECTIVES

- There is a hidden reservoir of low-risk thyroid cancer in the general population
- Care can be de-escalated in the low-and intermediate risk - thyroid cancers
- Review active surveillance of low-risk thyroid cancers and opportunities for less aggressive surgery

Speaker Location in:

Los Angeles, CA

Overview of Genitourinary Trauma: Evaluation and Management

LEARNING OBJECTIVES

- Learn to identify traumatic emergencies of the upper and lower genitourinary tract
- Learn appropriate initial evaluation of upper and lower urinary tract trauma
- Determine appropriate follow up for GU trauma patients

Speaker Location in:

Baltimore, MD

Palliative Care for the General Surgeon

LEARNING OBJECTIVES

- Review how and why the field of palliative care came about
- Understand general surgeons' role as care partners
- Provide a framework for having difficult goals-of-care conversations

Speaker Location in:

Chicago, IL

Patient Positioning for US-guided CVC placement

LEARNING OBJECTIVES

- Use of Trendelenburg position
- Use of contralateral head-rotation
- Vein displacement

Speaker Location in:

Monterrey, Nuevo Leon

Pearls and Pitfalls of A Young Reconstructive Microsurgeon

LEARNING OBJECTIVES

- To provide guidance for young surgeons performing complex microsurgical reconstruction
- To evaluate techniques that increase speed and efficiency during complex reconstructive cases
- To present algorithms to minimize complications and optimize surgical outcomes

Speaker Location in:

Shrewsbury, NJ

Pediatric Craniomaxillofacial Trauma

LEARNING OBJECTIVES

- Understand the epidemiology of facial injuries in children
- Discuss the impact that traumatic injuries have on the growing facial skeleton
- Understand the similarities and differences in the management of facial injuries in growing children compared to adults

Speaker Location in:

Seattle, WA

Pediatric Facial Trauma

LEARNING OBJECTIVES

- Understand the incidence and risks of pediatric facial trauma
- Review the differences between pediatric and adult facial trauma
- Discuss management strategies for various facial fractures

Speaker Location in:

Boston, MA

Pediatric Head Injury: Abuse, Accident, or Neglect

LEARNING OBJECTIVES

- Importance of high index of suspicion
- To differentiate between child abuse and neglect
- Evaluation of head injury in such cases

Speaker Location in:

Jubail, Jubail

Pelvic Exenterations

LEARNING OBJECTIVES

- Indication for pelvic exenterations
- Types of pelvic exenteration
- Post exenteration quality of life

Speaker Location in:

New Delhi, Delhi

Performance Psychology in Surgery: Parallels to Sport

LEARNING OBJECTIVES

- Understand the principals of deliberate practice
- Develop a strategy for incorporating active learning principles into learning and teaching
- Understand the impact of “intangible skills - confidence, perfectionism, imposter syndrome”- in a surgical expertise

Speaker Location in:

Atlanta, GA

Pharyngeal Surgical Anatomy in Sleep Surgery

LEARNING OBJECTIVES

- Analyze the anatomy of the pharynx with a surgical view
- Localization of dangerous areas of the pharynx when we perform sleep surgeries
- Possible surgical complications and how to avoid them through knowledge of the anatomy

Speaker Location in:

Buenos Aires, Argentina

Plastic Surgery Primer and Hot Topics in Plastic Surgery

LEARNING OBJECTIVES

- Identify the most commonly performed cosmetic surgical in the US, and reviews answers to the most common questions regarding these procedures
- Localization of dangerous areas of the pharynx when we perform sleep surgeries
- Possible surgical complications and how to avoid them through knowledge of the anatomy

Speaker Location in:

Sarasota, FL

Post-Breast Surgery Pain Syndrome: Shifting a Surgical Paradigm

LEARNING OBJECTIVES

- The participant will learn about post-mastectomy pain syndrome
- The participant will learn about the techniques used to treat it
- The participant will learn about preservation and the reconstructing the nerve to the breast and chest

Speaker Location in:

Great Neck, NY

Post-Operative Ileus

LEARNING OBJECTIVES

- Understand what is post-operative ileus
- Understand medical treatments of ileus
- Understand impact of enhanced recovery protocol

Speaker Location:

Iowa City, IA

Post-traumatic Stress and Resilience in Trauma Patients and Those Who Care for Them

LEARNING OBJECTIVES

- Understand how hospital-based violence intervention programs (HVIP) can impact outcomes for trauma patients
- Recognize high rates of post-traumatic stress and death by suicide in the first responder community
- Learn how an HVIP can be created or expanded to serve trauma patients and those who care for them

Speaker Location:

Chicago, IL

Predicting Personalized Graft Thrombotic Risk to Guide Thromboprophylaxis Therapy

LEARNING OBJECTIVES

- Discuss a novel personalized approach to determine antiplatelet/anticoagulation
- Detail the impact of thromboprophylaxis on outcomes in surgical patients
- Discuss a predictive method that incorporates personalized coagulation cascade data

Speaker Location in:

Boston, MA

Private Practice and You

LEARNING OBJECTIVES

- Choosing the right practice model for you after surgical training
- Time and life management post training
- Planning for success 5, 10 and more years after training

Speaker Location in:

Atlanta, GA

Prognosticating Acute Traumatic Spinal Cord Injury- Use of NSE & S100b Markers in Surgically Treated Patients?

LEARNING OBJECTIVES

- Can these markers be used reliably to predict extent of neural recovery in spine injury patients?
- Role of these biomarkers and their correlation (positive or negative variance?) with spinal injury
- Timing of estimation of these biomarkers and their role

Speaker Location:

Chandigarh, India

Pro Lap: Is Robotic Cholecystectomy Safer than Laparoscopic? Does Cost Matter?

LEARNING OBJECTIVES

- Safety of robotic vs laparoscopic surgery
- Cost of robotic vs laparoscopic surgery

Speaker Location in:

Galveston, TX

Prostate Cancer Recurrence: From Rising PSA to Castrate Resistant Prostate Cancer

LEARNING OBJECTIVES

- Understand treatment options for rising PSA
- Use of imaging studies to evaluate rising PSA
- Treatment of nonmetastatic castrate resistant disease

Speaker Location:

Springfield, IL

Racism in Obstetrics and Gynecology

LEARNING OBJECTIVES

- Explore fundamentals of discussing racism in medicine
- Review the history of OB/GYN and the intersection of racism
- Outline the state of racism in medicine today

Speaker Location in:

Houston, TX

Radiofrequency Ablation of Benign Thyroid Nodules. Indications, Technique, Outcomes and Strategies to Implementation

LEARNING OBJECTIVES

- To understand the rationale for radio frequency ablation of benign thyroid nodules
- To gain knowledge about the technical aspects and possible complications of RFA for the benign thyroid nodules
- To understand the pre-requisite skills required to implement radiofrequency into your clinical practice and learn how to implement the technology

Speaker Location:

New York, NY

Recent Advances in Breast Cancer Management

LEARNING OBJECTIVES

- Participants will be able to identify key components of 8th edition AJCC staging guidelines
- Participants will understand the key principles of oncoplastic breast surgery
- Participants will be able to identify new localization techniques for nonpalpable breast lesions.

Speaker Location:

Columbus, OH

Rectal Cancer, Where Have We Been and Where are We Going?

LEARNING OBJECTIVES

- Management of rectal cancer
- Multidisciplinary approach
- Adjuvant therapy

Speaker Location:

Houston, TX

Reducing the Morbidity of Breast Cancer Surgery: De-Escalation of Local Therapy

LEARNING OBJECTIVES

- To review the contemporary approach to oncologic surgery in the breast and axilla
- To review the varying biology of breast cancer and the impact this has upon modern treatment
- Adjuvant therapy

Speaker Location in:

New York, NY

Regulatory T-cells in Non-Small Cell Lung Cancer

LEARNING OBJECTIVES

- Review the current standard diagnosis/staging/treatment for lung cancer
- Review the role of the immune system and regulatory T-cells in cancer
- Discuss the roles of new targets for immunotherapy

Speaker Location:

Lebanon, NH

Rethinking Technology for Surgeons

LEARNING OBJECTIVES

- Clinical Informatics
- Maximize surgeon outcomes in austere environments
- Surgical telemedicine

Speaker Location in:

Evans, GA

Risk Predication in General Surgery

LEARNING OBJECTIVES

- Describe available tools for risk prediction in general surgery operations
- Understand limitations of risk prediction due to variability and other factors
- Explain role of risk prediction tools in enhancing informed consent/patient expectations/decision-making

Speaker Location in:

Iowa City, IA

Robotic Abdominal Wall Reconstruction

LEARNING OBJECTIVES

- To learn the history of complex abdominal wall reconstruction and its transition to robotics
- To learn the indications, possible complications, and management of high-risk patients for hernia recurrence
- To learn the techniques and approaches on robotic TAR component separation and eTEP for abdominal wall reconstruction

Speaker Location in:

Houston, TX

Robotic Abdominal Wall Reconstruction: Advanced Techniques

LEARNING OBJECTIVES

- Identify various robotic techniques that are available for abdominal wall reconstruction
- Know the limitations of abdominal wall reconstruction
- Realize that clinical data is limited for robotic abdominal wall reconstruction

Speaker Location in:

Cleveland, OH

Robotic-Assisted Reconstruction in Plastic Surgery

LEARNING OBJECTIVES

- Use of robot in head and-neck reconstruction
- Use of robot in breast reconstruction
- Use of robot in pelvic defect reconstruction

Speaker Location in:

Pittsburgh, PA

Robotic Bariatric Revisions: Prevention and Management Complications

LEARNING OBJECTIVES

- To understand the classification for bariatric revisions
- To learn the benefits of robotics when applies to bariatric revisions
- To identify the best strategies to prevent and manage complications from robotic bariatric revisions

Speaker Location in:

Houston, TX

Robotic Bariatric Surgery: Why?

LEARNING OBJECTIVES

- To learn the history of current bariatric procedures and their transition to the robotic approach
- To understand the indications and possible complications related to robotic bariatric procedures
- To identify four arguments in favor for the use of robotics for bariatric and metabolic surgery

Speaker Location in:

Houston, TX

Robotic Colorectal Surgery: Fancy Toy or Useful Tool?

LEARNING OBJECTIVES

- Understand specific benefits of robotic assisted surgery for colorectal diseases
- Learn about current status/use of minimally invasive techniques in colorectal surgery
- Vein displacement

Speaker Location in:

Tampa, FL

Robotic-Enhanced View: Totally ExtraPeritoneal (eTEP) Ventral Hernia Repair

LEARNING OBJECTIVES

- Understand retromuscular anatomy and identify important landmarks
- Recognize the role of robotics in abdominal wall reconstruction
- Understand eTEP advantages

Speaker Location in:

Cleveland, OH

Robotic Navigational Bronchoscopy: Navigating Lung Cancer Care in the Future

LEARNING OBJECTIVES

- Gain awareness of current challenges in the diagnosis and treatment of lung cancer
- Understand the importance of a lung nodule program and its impact on lung cancer
- Gain an understanding of new technology and how it may streamline the workflow from diagnosis to treatment in the lung cancer patient

Speaker Location in:

Los Angeles, CA

Robotic Transversus Abdominis Release (TAR)

LEARNING OBJECTIVES

- Identify relevant anatomy
- Learn pearls and pitfalls to robotic TAR
- Recognize advanced techniques requiring learning curve

Speaker Location in:

Cleveland, OH

[Role of Aspirin in Reducing Mortality in COVID Associated Mucormycosis \(CAM\)](#)

LEARNING OBJECTIVES

- Management of Covid Associated Mucormycosis (CAM)
- Forms of presentation and severity of Covid Associated Mucormycosis (CAM)
- How aspirin plays a role in reducing mortality in Covid Associated Mucormycosis (CAM)

Speaker Location in:

Bhubaneswar, Odisha

Role of Maxillofacial Surgeons in Oral Oncology

LEARNING OBJECTIVES

- Describe the surgical services needed in care of oral cancer
- The advancement in oral cancer care
- Improving the quality of life of patients with oral cancer

Speaker Location in:

Baton Rouge, LA

Role of Primary Site Surgery in Metastatic Breast Cancer

LEARNING OBJECTIVES

- Describe the prognosis and survival in stage IV breast cancer
- Analyze modern data on role of breast and axillary surgery in Stage IV breast cancer
- Delineate when you may consider role for surgical resection of metastatic disease Stage IV breast cancer

Speaker Location:

Kansas City, KS

Safe Opioid Prescribing and Preventing Substance Use Disorder: The Basics

LEARNING OBJECTIVES

- Analyze alternates to opioids to prevent opioid use disorder
- Review new consensus recommendations for best practices in opioid prescribing
- Recommend and analyze disease specific treatments

Speaker Location in:

Houston, TX

Short- and Long-term Management of the Terrifying Airway

LEARNING OBJECTIVES

- Recognize a spectrum of techniques to obtain a critical airway
- Review the endoscopic and surgical options for long-term management of difficult airways
- Explore the potential future options for the management of complex airway reconstruction

Speaker Location:

Dallas, TX

Skull Base Surgery: Lateral Skull Base Approaches

LEARNING OBJECTIVES

- Review surgical approaches to the lateral skull base
- Showcase specific clinical examples of lateral skull base tumors and appropriate management
- Provide the latest evidence for informed clinical decision making

Speaker Location:

New Orleans, LA

SLNG In Breast Cancer in LMIC

LEARNING OBJECTIVES

- De-escalation of axillary surgery in CA Breast
- Available options for SLNB
- Feasible SLNB option in LMIC

Speaker Location in:

New Delhi, Delhi

Soft Tissue Reconstruction in Craniomaxillofacial Trauma

LEARNING OBJECTIVES

- Demonstrate knowledge of the fundamental principles in traumatic soft tissue injuries to the face
- Review different treatment algorithms for facial traumatic soft tissue injuries
- Review challenging cases

Speaker Location:

Atlanta, GA

Stuck Between a Saw and a Hard Place: Field Resuscitation and Amputation

LEARNING OBJECTIVES

- Evaluate the indications for a surgeon to venture into the field and how to build a Jump Bag
- Apply situational awareness to maintain the safety of all involved
- Understand the limitations that may present in an austere environment

Speaker Location:

Chicago, IL

Successful Feedback for Leadership and Learning

LEARNING OBJECTIVES

- To understand the importance that feedback plays in growth and development of a surgeon
- To review current literature on feedback best practices
- To identify ways in which both faculty and trainees can better incorporate feedback into their education

Speaker Location:

Danville, PA

Supporting Budding Triple Threat Surgeons

LEARNING OBJECTIVES

- Review actual mandates for training residents to teach, research, work clinically
- Review own institutions' programs to see where there may be deficits
- Review formalized ways to integrate preparations for teaching, research, along clinical training

Speaker Location:

Boston, MA

Surgeon Engagement in Surgical Health Policy Advocacy

LEARNING OBJECTIVES

- Understand the importance of engagement in health policy advocacy by surgeons
- Work up adrenal incidentalomas
- Know indications from adrenalectomy

Speaker Location:

San Diego, CA

Surgeon Safety: Stalking and Other Crimes Against Surgeons

LEARNING OBJECTIVES

- Understand risks to personal safety
- Securing your safety and identity online, financially, and socially
- Providing help to other healthcare professionals

Speaker Location:

San Diego, CA

Surgery for Hyperthyroidism: When Should We Consider Resection?

LEARNING OBJECTIVES

- Hyperthyroidism is underdiagnosed and undertreated in the United States
- Thyroidectomy for Graves' disease has a favorable safety profile
- Thyroid storm is an uncommon in hyperthyroid patients undergoing thyroidectomy

Speaker Location:

Birmingham, AL

Surgery for IBD: Stop the Meds or Continue?

LEARNING OBJECTIVES

- Understand the management of medications for crohns and ulcerative colitis
- Understand the possible impact of IBD medications on surgical outcomes
- Create an evidence-based plan for stopping or continuing IBD medications prior to surgery

Speaker Location:

Salt Lake City, UT

Surgery in Space

LEARNING OBJECTIVES

- Describe the unique pathophysiology of microgravity
- Identify changes in techniques required to perform procedures in space
- List the additional challenges presented by lunar or martian mission

Speaker Location:

Springfield, MA

Surgical Anatomy Pelvic Nerves and Fascias Revisited- Implication for Pelvic Surgery

LEARNING OBJECTIVES

- To understand surgical anatomy of autonomic pelvic nerves
- To understand the embryological fascial planes and to respect it during operations
- To understand principals of nerve-sparing rectal and pelvic survey

Speaker Location:

Sofia, Bulgaria

Surgical Anatomy of Perianal Spaces - Revisited

LEARNING OBJECTIVES

- To understand the anatomy of perianal connective tissues
- To understand the different perianal spaces and relation to different types of perianal fistulas
- To understand the surgical anatomy of the operations for anal fistulas

Speaker Location:

Sofia, Bulgaria

Surgical Causes of Hypertension

LEARNING OBJECTIVES

- Recognize surgical causes of hypertension
- Work up adrenal incidentalomas
- Know indications from adrenalectomy

Speaker Location:

Fresno, CA

Surgical Informatics: The Explosion of Data Science in Surgery

LEARNING OBJECTIVES

- Identify unique elements of surgical data relative to other data science fields
- Explore data science and AI methods that will transform surgical practice
- Present how to translate health services research into informatics interventions

Speaker Location:

Boston, MA

Surgical Management of Bariatric Complications

LEARNING OBJECTIVES

- Identification of bariatric surgery complications
- Surgical management of bariatric surgery complications
- Tips and tricks for navigating bariatric surgery complications

Speaker Location:

Columbia, MO

Surgical Management of Melanoma: Where We Are, Where We are Heading

LEARNING OBJECTIVES

- Current tenets of melanoma surgery
- Relevant scientific breakthroughs
- Melanoma surgery of the future

Speaker Location:

Seattle, WA

Surgical Management of Obesity

LEARNING OBJECTIVES

- Learn the indication for bariatric surgical procedures
- Learn the laparoscopic and robotic technique for bariatric surgical procedures
- Learn the management of complications of bariatric surgical procedures

Speaker Location:

Denton, TX

Surgical Management of Obstructive Sleep Apnea

LEARNING OBJECTIVES

- Discuss the radiograph and clinical diagnostic approaches of evaluating OSA
- Discuss the collaborative and team approach to manage OSA
- Review different surgical approaches in management of OSA

Speaker Location:

San Francisco, CA

Surgical Management of Obstructive Sleep Apnea

LEARNING OBJECTIVES

- Incidence and diagnosis of OSA
- Surgical Treatment of OSA
- Latest Advancement

Speaker Location:

Baton Rouge, LA

Surgical Management of the “No-Option” Diabetic

LEARNING OBJECTIVES

- To understand deep venous arterialization
- Practically apply novel surgical principles to no option patients
- To understand outcomes in patients with advanced diabetic vascular disease

Speaker Location:

Boston, MA

Surgical Management of Vocal Cord Paralysis

LEARNING OBJECTIVES

- Learn the pathophysiology of vocal cord paralysis
- Learn the disease course and clinical presentation of vocal fold paralysis
- Learn the prognosis and management of vocal fold paralysis

Speaker Location:

Dallas, TX

Surgical Quality Improvement-Moving the Needle or Measuring for the Sake of Measurement?

LEARNING OBJECTIVES

- Provide a conceptual framework for thinking about surgical quality improvement
- Discuss relevant examples of structure, process, and outcome quality measures as well as their limitations
- Discuss alternative approaches for thinking about measuring surgical quality

Speaker Location:

Houston, TX

Surgical Strike with Chemotherapy: The Paradigm Shift in the Management of Peritoneal Cancer

LEARNING OBJECTIVES

- Peritoneal cancers
- HIPEC
- Cytoreductive surgery

Speaker Location:

Kolkata, West Bengal

Surgical Therapies for Hearing Loss

LEARNING OBJECTIVES

- Demonstrate the wide variety of surgeries available for hearing loss
- Review limitations and proper patient selection for surgical therapy for hearing loss
- Discuss implantable hearing devices

Speaker Location:

New Orleans, LA

Teach Surgery in a Developing Country While You are Still a Young Fellow

LEARNING OBJECTIVES

- To inspire the young surgeons, especially those that are working in developing countries, to start a teaching surgery program
- Answer the question: Why do you need to wait until you are an older surgeon to start a teaching program?
- Show our experience during the last three years as a founders of a university MIS fellowship

Speaker Location:

San Salvador, El Salvador

Temporomandibular Joint Surgery

LEARNING OBJECTIVES

- Diagnosis of TMJ disorders
- Surgical Management of TMJ disorders
- Multidisciplinary treatment

Speaker Location:

Chicago, IL

The Dangers of Vaping: What Health Care Providers Need to Know

LEARNING OBJECTIVES

- Review physiologic harms of smoking, vaping and nicotine
- Review vaping devices and the specific health risks of these inhalants
- Review strategies for vaping and smoking cessation

Speaker Location:

Lebanon, NH

The Evolution and Current Management of Splenic Trauma

LEARNING OBJECTIVES

- Review anatomy, physiology and historical perspective of the spleen
- Describe common injury patterns and options in management
- Analyze paradigm changes and outcome trends

Speaker Location:

Reading, PA

The Evolving Role of the Trauma/Acute Care Surgeon

LEARNING OBJECTIVES

- Understand the role of the trauma surgeon within the health system
- Recognizing the ongoing learning and evolution of the role as an acute surgeon
- Embracing leadership in actions and patient ownership

Speaker Location:

Philadelphia, PA

The Future of Technology and Game-Enabled Medical and Surgical Education

LEARNING OBJECTIVES

- Explain the difference type of technologies and games being used in medical and surgical education
- Analyze the role of technology and games can play in an educational experience
- Discuss the potential future of medical and surgical education using technology and games

Speaker Location:

Huntington, NY

The Inward Journey: Lessons Learned from an Alpha Omega Alpha Fellow in Leadership

LEARNING OBJECTIVES

- Understanding the concept of meta-narratives and how they impact surgeons as leaders
- Exploring the inherent strengths and weaknesses of surgical training in the process of leadership development
- Discuss surgeon burnout and recognize leadership engagement as an important tool to combat this epidemic

Speaker Location:

Denver, CO

[The Role of Contralateral Prophylactic Mastectomy for Unilateral Breast Cancer](#)

LEARNING OBJECTIVES

- To understand factors associated with contralateral prophylactic mastectomy
- To understand patient reported outcomes after contralateral mastectomy
- To review new research in this field

Speaker Location:

Boston, MA

The Role of Cytoreductive Surgery and Heated Intraperitoneal Chemotherapy for Peritoneal Surface Malignancies

LEARNING OBJECTIVES

- Understand current status of CRS +/- HIPEC in management of appendiceal, gynecologic, and colorectal malignancies
- Describe patient characteristics important to selection for CRS/HIPEC
- Feel comfortable evaluating and documenting the extent of disease after unexpectedly finding carcinomatosis

Speaker Location:

Iowa City , IA

The Role of Diversity in Medicine

LEARNING OBJECTIVES

- Understand the financial benefits of diversity in medicine
- Recognize the inhibitors of developing diversity
- Developing mentorship networks

Speaker Location:

Las Vegas, NV

The Role of Neoadjuvant Endocrine Therapy for Breast Cancer Patients, and Surgical Considerations

LEARNING OBJECTIVES

- To understand the data supporting the use of neoadjuvant endocrine therapy for breast cancer
- To understand the goals of neoadjuvant endocrine therapy
- To consider axillary management strategies after neoadjuvant endocrine therapy

Speaker Location:

Boston, MA

The State of Gender Trends in the Trauma Community

LEARNING OBJECTIVES

- Evaluate current membership, invited lecture, and leadership trends in the trauma community
- Appraise current barriers to transparency of gender demographics
- Discuss implicit bias and actions to overcome

Speaker Location:

Reading, PA

The Surgical Management of ADH with an Ipsilateral Breast Cancer

LEARNING OBJECTIVES

- Risk of upgrade of ADH when an ipsilateral breast cancer is present
- Risk of recurrence of ipsilateral breast cancer with the additional atypia
- Features of ADH that are lowest risk for upgrade and can be considered for observation

Speaker Location:

Kansas City, KS

Things You Have to Treat Before Doing Bariatric Surgery

LEARNING OBJECTIVES

- Recognize that there are problems the patient comes with that is not just about their weight
- Choose patients who are willing to address the emotional aspects of weight loss
- Knowing your medicine capabilities to be able to treat your bariatric patient

Speaker Location:

Keller, TX

Thriving While Cutting and Sewing

LEARNING OBJECTIVES

- Discuss unique challenges that female surgeons face and how to overcome them
- Planning for a surgical career after training
- Thriving as a surgeon both in and out of the operating room

Speaker Location:

Atlanta, GA

Thrombosis and Regeneration of the Microvascular Network in Wound Infection

LEARNING OBJECTIVES

- Establish the burden of surgical wound infection globally
- Detailed a personalized method to predict wound healing propensity in surgical patients with microvascular disease
- Discuss a novel methods of personalizing wound healing ability via antiplatelet agents

Speaker Location:

Boston, MA

Time Management: When to Say Yes and How to Say No

LEARNING OBJECTIVES

- Use the Eisenhower Matrix and your mission statement to classify your daily activities
- Learn to evaluate every facet of an opportunity to decide whether to say yes
- Appreciate techniques to use when you need to say no

Speaker Location:

Baltimore, MD

TMJ Surgery

LEARNING OBJECTIVES

- Introduction to TMJ procedures
- Surgical intervention of the TMJ
- Case selection

Speaker Location:

Chicago, IL

Total Laparoscopic Whipples Procedure

LEARNING OBJECTIVES

- Minimally invasive
- Role of new technology in laparoscopic-3D
- Role of new gadgets in minimizing operating time

Speaker Location:

Hyderabad, Telangana

Training Residents of All Backgrounds

LEARNING OBJECTIVES

- Methods to ensure inclusion
- Methods to avoid racial bias
- Methods to open dialogue with trainees of all backgrounds

Speaker Location:

Chicago, IL

Transgender Surgery

LEARNING OBJECTIVES

- Scope of transgender care
- Scope of transgender surgery
- State of transgender care

Speaker Location:

New York, NY

Transition of Care for Congenital Colorectal Patients

LEARNING OBJECTIVES

- How to establish a transitional care program
- Identify need for transitional care
- Improve patient outcomes through transitional care

Speaker Location:

Columbus, OH

Trauma Surgery: An Osteopathic Perspective

LEARNING OBJECTIVES

- Outline how osteopathic principles and practice intersect with trauma surgery
- Distinguish when osteopathic manipulative treatment may improve outcomes of the injured patient
- Appraise opportunities to study and advance the use of osteopathic principles and practice into the care of injured patients

Speaker Location:

Mineola, NY

Treatment of Common Anorectal Disorders

LEARNING OBJECTIVES

- Identify common anorectal disorders
- Identify Non-operative treatments for anorectal disorders
- Identify operative treatments of anorectal disorders

Speaker Location:

Danville, PA

Triage of Complicated Mild TBI

LEARNING OBJECTIVES

- Understanding when a routine follow-up head CT is needed in complicated mild TBI (cmTBI)
- Analyze how telemedicine can help triage cm TBI
- Learn how to implement an emergency observation protocol for cm TBI

Speaker Location:

Boston, MA

Under the Lens: Video Review for Performance Improvement

LEARNING OBJECTIVES

- To understand what video review is in surgery and trauma
- To describe current utilizations of video review and applications of the technology
- To describe future directions and applications of the technology

Speaker Location:

Dallas, TX

Unlocking the Potential of Macrophages in Human Cancer: Overcoming the IL-10 in Liver Metastases

LEARNING OBJECTIVES

- To understand what video review is in surgery and trauma
- To describe current utilizations of video review and applications of the technology
- To describe future directions and applications of the technology

Speaker Location

Seattle, WA

Update on Abdominal Rectus Diastasis Treatment

LEARNING OBJECTIVES

- Present our experience in the treatment of the diastasis
- Discuss which is the best therapeutic option
- Show what is new in diastasis treatment

Speaker Location:

Capital Federal, Argentina

Updates in Colorectal Cancer Screening and Polyp Surveillance

LEARNING OBJECTIVES

- Understand new guidelines for Colorectal Cancer Screening and Polyp Surveillance
- Understand the rationale for new guidelines
- Describe various options, with associated pros and cons, for colorectal cancer screening

Speaker Location:

Tampa, FL

Updates in Diverticulitis

LEARNING OBJECTIVES

- Identify and diagnose diverticulitis
- Identify complications of diverticulitis
- Create an evidence-based treatment plan for diverticulitis

Speaker Location:

Salt Lake City, UT

Updates in Melanoma: A Surgeon's Perspective

LEARNING OBJECTIVES

- Describe the role of the surgeon in the management of patients with locoregionally advanced melanoma
- Understand management changes of primary melanoma
- Describe systemic therapy options in the neoadjuvant, adjuvant and metastatic settings

Speaker Location:

Atlanta, GA

Urodynamics Made Easy(ier)

LEARNING OBJECTIVES

- Determine the indications to obtain a urodynamic study
- Identify common errors in urodynamic interpretation
- Become familiar with interpreting urodynamic studies for general urologic indications

Speaker Location:

Baltimore, MD

Urogenital Fistula in Women

LEARNING OBJECTIVES

- Discuss available surgical approaches for female urogenital fistula
- Describe interposition grafts/flaps and their limitations
- Introduce techniques to prevent formation of genitourinary fistula

Speaker Location:

Baltimore, MD

Use of Telehealth to Serve Rural Populations

LEARNING OBJECTIVES

- Function of telehealth for rural bariatric surgery patients
- Incorporation of telehealth in rural setting
- Limitations of telehealth in rural setting

Speaker Location:

Columbia, MO

Value-Based Care in Vascular Surgery— We Can Do Better

LEARNING OBJECTIVES

- Define value-based care
- Discuss metrics of value-based care as they relate to vascular surgery
- Discuss opportunities to provide feedback and implement change in the setting of overuse in vascular surgery

Speaker Location:

Baltimore, MD

Vascular Emergencies

LEARNING OBJECTIVES

- Identify patients with emergent conditions due to vascular pathology
- Understand timeliness of vascular involvement in management of patients with vascular emergencies
- Understand basic diagnostics for patients with suspected vascular emergencies

Speaker Location:

Philadelphia, PA

Vascular Surgery Training for General Surgeons

LEARNING OBJECTIVES

- Sensitizing general surgery residents to vascular presentations
- High index of suspicion for acute limb ischaemia
- Initiative for vascular surgery

Speaker Location:

New Delhi, Delhi

Vascular Trauma: Techniques and Management

LEARNING OBJECTIVES

- Understand presentation of patients with traumatic vascular injuries
- Understand mechanism of vascular injury
- Understand operative versus non-operative management of vascular injuries

Speaker Location:

Philadelphia, PA

Virtual Surgical Planning

LEARNING OBJECTIVES

- Review of virtual surgical planning workflow
- Learn advantages of patient specific hardware
- Learn technical applications for patient specific hardware

Speaker Location:

Houston, TX

Voice Rehabilitation After Thyroid Surgery

LEARNING OBJECTIVES

- Learn intraoperative techniques for monitoring for possible paralysis
- Discuss natural disease course of unilateral and bilateral vocal fold paralysis
- Learn long-term management of vocal fold paralysis

Speaker Location:

Dallas, TX

Voice Restoration After Thyroid Surgery

LEARNING OBJECTIVES

- Learn intraoperative monitoring techniques and how to limit injury to recurrent laryngeal and superior laryngeal nerve
- Learn the clinical consequences of unilateral and bilateral vocal fold paralysis
- Learn the office and operative management of vocal fold paralysis as well as prognosis

Speaker Location:

Dallas, TX

[We Caught it Early, Now What? Endoscopic Interventions for Barrett's HGD and Early AdenoCa](#)

LEARNING OBJECTIVES

- Examine treatment strategies for BE with HGD
- Discuss options for early stage GEJ adenocarcinoma
- Demonstrate recent advances in surgical endoscopy

Speaker Location:

Jackson, MS

“Well, in hindsight..” The Biases and Blind Spots Behind Our Mistakes

LEARNING OBJECTIVES

- Understand how we process information and make decisions
- Identify what types of biases contribute to our mistakes
- Discuss cognitive dissonance and why we are unable to recognize our mistakes

Speaker Location:

Norfolk, VA

What Can You Ask for in a Contract?

LEARNING OBJECTIVES

- Determine what contract elements are vital for protecting personal and professional interests
- Learn how to effectively negotiate with your potential employer through the employment contract process
- Understand the critical importance of utilizing an attorney familiar with surgery and surgical subspecialties in helping advocate for your contract “asks

Speaker Location:

John Creeks, GA

What is the Role of Professional Societies in Diversity, Equity and Inclusion Initiatives

LEARNING OBJECTIVES

- Recognize the need for improving diversity, equity, and inclusion in surgery
- Identify strategies for increasing diversity, equity, and inclusion
- Recognize the role of surgical societies in diversity, equity, inclusion initiatives in surgery

Speaker Location:

Brooklyn, NY

What the Corporate World Can Teach Us About Hiring

LEARNING OBJECTIVES

- Understand why interviewing for fit doesn't necessarily result in good hires
- Describe situational and behavioral interview techniques
- Distinguish between contingent recruiters and retained search firms, and why the difference matters

Speaker Location:

Baltimore, MD

What to Do During a Major Intraoperative Hemorrhage Event?

LEARNING OBJECTIVES

- Describe key steps to obtain control of major vascular bleeding
- What not to do during a major cavitory intraoperative bleeding
- How control of venous and arterial bleeding is different and what to do about each type of bleed

Speaker Location:

Charlottesville, VA

Women in HPB Surgery

LEARNING OBJECTIVES

- Understand why diversity matters
- Understand current state of women in HPB Surgery
- Learn action items toward inclusion in HPB Surgery

Speaker Location:

Rochester, MN

You Landed Your First Academic, Now What?

LEARNING OBJECTIVES

- Successful steps toward a building a practice, developing research, teaching resident/fellows/med students during the first years in academic practice.
- Time management in academic setting.
- Putting a portfolio together from day one for P&T committee

Speaker Location:

Charlottesville, VA

“You’re Not Changing Me Are You, Doc?” Navigating Revision Surgery in the Private Practice World

LEARNING OBJECTIVES

- Ascertain knowledge of revision rates for common procedures in cosmetic plastic surgery
- Understand the main contributors to reduced patient satisfaction following cosmetic plastic surgery
- Review approaches to the financing of revision surgery, and components of a full and complete release for “no charge” surgery

Speaker Location:

Sarasota, FL
