

AMERICAN COLLEGE OF SURGEONS

*Inspiring Quality:
Highest Standards, Better Outcomes*

2020
NCDB/RQRS
Edits
(v16 and v18)

October 4, 2019

The following pages show which edits are included in each of the edit sets selected by the NCDB and RQRS configuration files, and how NCDB scores those edits.

NCDB assigns scores to each edit that is failed by a submitted case. The scores are used to direct processing and to help select the better record when more than one record applies to the same case. Multiple records are submitted when a facility updates or corrects a previously-reported item (a submission duplicate) or when a patient receives care from more than one accredited program (a clinical duplicate).

Scores for NCDB Submissions

- 200 = failure will cause the record to be rejected
For Call for Data 2019, must resubmit by **May 31, 2020**
- 1 = failure must be corrected by **May 31, 2020**
For cases diagnosed in **2004** or more recently
- 0 = advisory that this edit should be corrected
before NCDB submission; not a failure,
but correction is recommended for accuracy

Scores for RQRS Submissions

- 200 = failure will cause the record to be rejected
- 1 = failure must be corrected by resubmission
- 0 = advisory that this edit should be corrected
before NCDB submission
- Blank = edit not in RQRS Submission Edit Set

These edit sets and scores apply to cases submitted during 2020 using
NAACCR record layout 16.0 and 18.0

- NCDB Call for Data Submissions
- NCDB submissions for deficiency resolution
- RQRS submissions

Version 16.0 – RQRS
