## **Return to Cancer Screening PDSA Quality Improvement Project and Clinical Study Frequently Asked Questions**

**We have already held our 4th quarter meeting for this year. Can we report the results in our 1st quarter meeting of 2022 to get credit?**

Yes, this is acceptable.

**Is it too late to enroll in these studies?**

Yes, it is too late to enroll in the PDSA. The deadline to enroll was June 1, 2021.

**Does this project count towards 2021 or 2022?**

The compliance credit for all standards will apply to 2021 even if activity extends into 2022.

**What if we can't get the November data until January?**

Programs have until December 31, 2021, to submit their November screening numbers in either the PDFs or REDCap forms.

**Do the PDFs need to be completed if we are doing the REDCap?**

No, programs that are participating in the Clinical Study do not need to complete the PDFs and REDCap.

**Will we need to print or screenshot REDCap forms to have available for surveyors? Or will surveyors have access to these prior?**

REDCap forms will be uploaded into the PRQ as PDFs. Form A was emailed to the individual that completed the form. Form B/C will be emailed as a PDF to the point of contact after the form is submitted.

**I don't believe we received form B/C from REDCap. Who should I contact?**

If you did not receive or cannot locate Form B/C, send an email to Jessica Dangles ([jdangles@facs.org](mailto:jdangles@facs.org)) and include the name of the individual that filled out the form along with the disease site.

**Did Form A need to be "submitted" if we are only doing the PDSA portion of the project? We were under the impression documentation simply saved for survey?**

For programs only participating in the PDSA, please wait until your next site visit to upload the forms into the PRQ.

**Are we able to present our portion at a conference?**

Yes, please feel free to present your data at your local conference. We kindly ask you to not present nationally.

**Our screening numbers show that there are monthly variations. Is this ok?**

As long as your facilities made an effort to improve screening, that is what's important!

**We are an accredited CoC programs that is part of an INCP, do we need a separate form for each facility?**

Yes, a separate PDF/REDCap form is required for each facility. If participating in the clinical study, please contact [jdangles@facs.org](mailto:jdangles@facs.org) if you did not fill out separate forms for each facility within your INCP and we will get your forms corrected. Please include your pre-pandemic and pandemic screening numbers for each facility.

**We are a NAPBC accredited program, will participating in the PDSA fulfill all of Standard 4.1?**

Standard 4.1 will be fulfilled if the breast center performed at least one screening intervention during the 6-month (June 1-November 30, 2021) PDSA.
