ACS NSQIP®

"Quality Improvement through Quality Data"

User Guide for the 2017 ACS NSQIP Procedure Targeted Participant Use Data File (PUF)

American College of Surgeons

National Surgical Quality Improvement Program

Released:
October 2018

American College of Surgeons
Inspiring Quality:
Highest Standards, Better Outcomes
100+years

Contents

1. Introduction

This document is designed to accompany the 2017 Procedure Targeted Participant Use Data File (PUF) available for download on the American College of Surgeons National Surgical Quality Improvement Program (ACS NSQIP®) website (www.facs.org/quality-programs/acs-nsqip). The data contained in this version of the Procedure Targeted PUF covers dates of surgery from January 1, 2017 to December 31, 2017. The sections contained herein will provide the user with information on how to request the Procedure Targeted PUF, the contents of the data files, the data collection background, the inclusion and exclusion criteria for cases and hospitals, the data limitations, and the data point definitions and descriptions.

This user guide applies specifically to the 2017 Procedure Targeted PUF. Hospitals utilizing the PUF from a different year should refer to the user guide specifically tailored to that particular data set.

2. Merging Cases with the ACS NSQIP PUF

Using the unique CASE ID variable, target-specific variables can be merged to the main ACS NSQIP adult PUF.

3. Data Request Process

An individual who has an official appointment at a fully enrolled site and wants to obtain a copy of the ACS NSQIP Procedure Targeted PUF can do so by visiting www.facs.org/quality-programs/acs-nsqip and following the steps listed below:

1. From the ACS NSQIP main page (www.facs.org/quality-programs/acs-nsqip) the requestor can scroll down to the “Quick Links” box on the left side. Within that box you can click on the “Participant Use Data File” link. This will take you to the PUF information and request page.
2. Following a brief introduction and explanation of the various PUFs, the requestor can click on “Request Data Set.”
3. This will take the requestor to the Data Use Agreement. This is a 3-page document that implements the data protections of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and the ACS NSQIP Hospital Participation Agreement. Delivery of the PUF is contingent on agreement to the terms and conditions specified within the Data Use Agreement. You can read the Data Use Agreement from this page or download the 3-page document. The requestor is then required to type in their first and last name

and click on "Request Data File." By clicking on "Request Data File" the requestor agrees to the terms and conditions of the Data Use Agreement.

4. Requestors will then be required to complete a brief online form to provide ACS with basic information about themselves, including the participating hospital in which they are currently employed and in what capacity, as well as how the requestor plans on using the PUF data. Once all of the required fields are completed, the requestor clicks "Submit."
5. ACS NSQIP staff will review the request in a timely manner. Program contacts at participating sites will be contacted at this time to confirm the requestor's affiliation with the hospital and confirm internal approval of the PUF request.
6. Following receipt and confirmation of the information submitted, an email will be sent to the requestor containing a username and password along with the URL to download the data. The web link will be active from the time of the email for 10 full days (240 hours).
7. The file will be available in three different formats (SAS, SPSS, and Text) and depending on the connection speed should take between 5 and 30 minutes to download.
8. The requestor may be contacted to confirm receipt of the data file and allow for feedback on the delivery mechanism, data points contained, and data file format.

4. File Description

Each summer/fall a PUF will be made available for the previous calendar year's data. The Procedure Targeted PUF is available in one of three different formats - SAS, SPSS and Text.
A brief description of the different formats follows:

Vascular:

File Name	Type	File Size	Variables	Cases	Sites

5. Data Collection Background and Data Quality

The ACS NSQIP collects data on over 150 variables, including preoperative risk factors, intraoperative variables, and 30-day postoperative mortality and morbidity outcomes for patients undergoing major surgical procedures in both the inpatient and outpatient setting. A site's trained and certified Surgical Clinical Reviewer (SCR) captures these data using a variety of methods including medical chart abstraction.

Required data variables are entered via web-based data collection to the ACS NSQIP website. Portions of the data may be automatically populated by a software program that was developed to extract data from the participating hospital's existing information systems. Requestors should contact the SCR(s) at their hospital for detailed information on how the hospital collects its ACS NSQIP data.

To ensure the data collected are of the highest quality, the ACS NSQIP has developed a host of different training mechanisms for the SCRs and conducts an Inter-Rater Reliability (IRR) Audit of selected participating sites. In addition to an initial web-based training program, the ACS NSQIP requires SCRs to complete a series of web-based training modules followed by a certification exam that must be retaken annually. The modules and certification exam focus on the program, processes, and analysis; preoperative, intraoperative, and postoperative definitions; and case studies. These modules are complemented by a growing online decision support system that ensures the SCRs have the knowledge and resources available to collect high-quality data.

The IRR Audit is a fundamental tool of ACS NSQIP to assess the quality of the data collected at participating sites. The process involves the review of multiple charts, some of which are

selected randomly and others selected based on criteria designed to identify potential reporting errors. For example, cases with five or more preoperative risk factors and no reported mortality or morbidity or cases with two or fewer preoperative risk factors and reported mortality or morbidity will be selected for chart review. Operating room logs are also audited to ensure correct sampling of cases.

The combined results of the audits completed to date revealed an overall disagreement rate of approximately 2.3% for all assessed program variables. The ACS NSQIP has determined that an IRR Audit disagreement rate of 5% or less is acceptable. Sites that have higher than a 5% disagreement rate are not provided a hospital odds ratio in the ACS NSQIP Semiannual Report and may be required to undergo an additional audit following training and education recommendations from the ACS NSQIP.

6. Sampling Process and Case Exclusion Criteria

Sites participating in the ACS NSQIP can do so in a variety of options that cover general/ vascular surgery, multispecialty surgery, or procedure targeted (reported separately). Each participation option includes a systematic sampling process that is described below.

Systematic Sampling Process

Larger institutions normally experience a significant volume of surgical cases. This presents the problem of managing an overwhelming workload. In order to prevent bias in choosing cases for assessment, a systematic sampling process was developed. An important tool to utilize while performing the systematic sampling process is the 8-Day Cycle Schedule. The 8-day cycle works as follows: If the first ‘cycle’ begins on a Monday, it continues through to include the following Monday (an 8-day period of time). The next cycle begins on Tuesday and continues through to include the following Tuesday. And so on. This process assures that over time cases have equal chances of being selected from each day of the week.

Note: There are some exceptions to the systematic sampling inclusion. Hospitals participating in the Small & Rural option will collect all ACS NSQIP-eligible cases at their hospital. Hospitals participating in Essentials (Multispecialty only) or in the Procedure Targeted (General/Vascular OR Multispecialty) options are provided with sampling requirements specific to their site and may opt to collect more than the specified sampling requirements if resources allow.

Case Exclusion Criteria

The following exclusion criteria were applied to cases collected in 2017. For the current inclusion/exclusion criteria please contact the ACS NSQIP Clinical Support Team at clinicalsupport@acsnsqip.org.

- Minor Cases (all cases that are not considered Major)
- Patients under the age of 18 years.
- Patient for the case in question has been assigned with an ASA score of 6 (brain-death organ donors).
- Cases involving Hyperthermic Intraperitoneal Chemotherapy (HIPEC)
- Trauma cases: Any patient that meets the trauma exclusion criteria will be excluded.
- Transplant cases: For any patient who is admitted to the hospital and has a transplant procedure, that transplant procedure and any additional surgical procedure during the transplant hospitalization will be excluded.
- Cases beyond three per cycle for limited cases: For each program option (excluding Small & Rural), only a maximum of three cases from each of the below procedures should be included per 8-day cycle. Any case beyond the case limit of three for any of these procedures should be excluded.
    - Inguinal Herniorrhaphies
    - Breast Lumpectomies
    - Laparoscopic Cholecystectomies
    - TURPs and/or TURBTs

      (This limit does not apply for Procedure Targeted sites that are targeting TURPs.)
- Cases beyond the required number per your site's contract for each cycle.
- A return to the operating room that is related to an occurrence or complication of a prior procedure
- Multiple NSQIP assessed cases within 30 days: Any patient who already has a NSQIP-assessed procedure entered within the previous 30 days at your site should be excluded. Only one NSQIP-assessed procedure can be abstracted patient, per 30 days, for each

Hospital Exclusion Criteria

In addition to the case inclusion/exclusion criteria, hospital inclusion/exclusion criteria are also imposed. To maintain the highest level of data quality, only cases included in the odds ratio analysis are included in the PUF. These cases go through an additional level of scrutiny as they are passed from data collection to statistical analysis. A site is excluded from the odds ratio calculations and the PUF if it fits any of the following criteria:

- Sites that exhibit issues with either data quality or 30-day follow-up may be excluded in order to ensure the integrity of PUF data
- Inter-Rater Reliability Audit disagreement rate is over 5%

7. Data Limitations

While every effort has been made to make the PUF as complete as possible, the data do have certain limitations. Some of these limitations have been deliberately introduced to safeguard the privacy of patients (such as removal of absolute dates). Other limitations are due to resource constraints (such as the collection of generic surgical variables only, except for the procedure targeted option, which is reported separately). The following items represent the most salient limitations of the data:

- Because such a wide variety of operations are tracked, the variables are necessarily generic in nature. This limitation may pose difficulties for researchers attempting in-depth research on specific conditions or operations. However, surgical Targeted PUF datasets are now available which address target-specific predictors and outcomes for many types of operations.

- While the sex and race distributions are reasonably representative of the national surgery patient population, only patients over the age of 18 are available for assessment, so the age distribution is somewhat truncated. Patients over the age of 90 are also grouped into a 90+ category to prevent cases from being identifiable due to unique data.

- Patients are followed after surgery for a maximum of 30 days. Complications or death after that period are not included. Hospitals may follow patients longer than 30 days, but this data is not reported by NSQIP.

- In order to comply with HIPAA requirements, all absolute dates have been removed. The most critical of these is the date of surgery, which has been reduced to year of surgery only. Some dates (hospital entry, dates of laboratory tests, and so on) have been recoded into durations e.g. Date of Admission and Date of Discharge is recoded into Hospital Length of Stay.

- In order to comply with the Hospital Participation Agreement (HPA) that is agreed to between the ACS and participating sites, facility identifiers as well as geographic information regarding the case have been removed. The HPA stipulates that the ACS does not identify participating sites. Site identification could be possible even with blinded identifiers through advanced statistics. A stipulation of access to the PUF is completion of the Data Use Agreement that strictly prohibits attempts to identify hospitals, health care providers, or patients.

- While many risk factors are tracked, preventative measures are not recorded which can lead to an underestimation of the risk of certain conditions when such measures are routinely taken before surgery.

- The data are submitted from hospitals that are participating in the ACS NSQIP and do not represent a statistically valid nationally representative sample.

- Most patients do not receive all possible preoperative laboratory tests, so some of these variables have a high percentage of missing values (15% to 45%, depending on the tests). This high percentage of missing data can make it problematic to use these variables in a traditional logistic regression model as well as in many other types of analysis.

This list may not include all data limitations and additional limitations may apply in future versions of the data.

Graft failure, Coma, and Peripheral Nerve Injury Data Update

As first identified and reported in December of 2014, we have identified a problem in reported results for three outcome variables that existed in the Classic program, but did not exist in Essentials, between 2011 and 2013.

As it is mandatory to report outcome variables, we have historically converted the absence of an affirmative response (i.e., missing data) to "No Complication". This otherwise appropriate procedure was mistakenly applied to three outcome variables which were dropped from Essentials beginning in 2011 (Graft failure, Coma, Peripheral Nerve Injury). This logic resulted in "No complication" being assigned to missing data coming from Essential sites where, in fact, no data was being collected for these three outcomes. For the 2013 SAR (when Classic no longer existed) this isn't much of a problem as users would clearly know that something was wrong when 100% of the cases had "No complication" (for 2014 missing values were inserted for these historical outcome variables rather than "No complication"). However for 2011 and 2012, when some sites were Essentials and some Classic, a PUF user would see a strange, precipitous, drop in event rates for these outcomes.

Because of this problem, Graft failure, Coma, and Peripheral Nerve Injury should not be considered accurate for any PUF after 2010.

8. Contact Information

All questions about the Procedure Targeted User Guide or PUF, as well as comments and suggestions for improvements are welcome and may be directed to Brian Matel, ACS NSQIP Statistical Report Manager, via email at bmatel@facs.org.

9. Frequently Asked Questions

Request Process

Q: Who has access to this file?

A: Any individual with an official appointment at a fully participating site will be given access to the file following completion of the Data Use Agreement and a short set of questions that are available on the website.

Q: Is the file available to individuals from nonparticipating sites?

A: At this time the data files are only available to individuals with official appointments at fully participating sites.

Q: I am at a NSQIP-participating site and would like to work on a research project with others from a different site that is not participating. Will I be allowed to do that?

A: Yes, however, the NSQIP affiliated researcher must be the lead investigator on all PUF-based research projects and is responsible for the PUF dataset, even if forwarded to someone else. The non-participating collaborator must also sign the DUA.

Q: How do I obtain a copy of this file?

A: Please see the "Data Request Process" on page 1 of this document for a step-by-step approach on how to do so.

Contents of the Files

Q: What is in this file?

A: The file contains Health Insurance Portability and Accountability Act (HIPAA) de-identified data from sites participating in the ACS NSQIP that received risk-adjusted reports in 2017. The variable name, variable label, data definition, and other pertinent information are provided in Section 10: Data Variables and Definitions.

Q: Are other PUF data sets available?

A: Between Procedure Targeted and Essentials, there are a total of 37 other PUF files available for request / download:

Essentials

PUF Year	PUF Type	Cases	Sites
2005/2006	Essentials	152,490	121
2007	Essentials	211,407	183
2008	Essentials	271,368	211
2009	Essentials	336,190	237
2010	Essentials	363,431	258
2011	Essentials	442,149	315
2012	Essentials	543,885	374
2013	Essentials	651,940	435

2014	Pancreatectomy	5,187	106
2015	Pancreatectomy	6,032	120
2016	Pancreatectomy	6,244	137
2016	Proctectomy	4,217	159
2016	Thyroidectomy	5,871	93
2016	Esophagectomy	1,034	71
2016	Appendectomy	12,376	115
2016	Hip Fracture	9,390	117

Q: Where can I find the Procedure Targeted variables and definitions?

A: You can contact your site's SCR for the Procedure Targeted Variables and Definitions.

Q: What other reference materials are available?

A: Other PUF reference materials include the ACS NSQIP Targeted Procedure Materialized Views, also available through your site's SCR.

Q: Are site identifiers included in the database?

A: At this time we do not provide any geographic or site-specific identification. We took this approach to ensure the privacy of both the participating sites and surgeons.

Q: Are there surgeon-specific identifiers included in the database?

A: At this time we do not provide any surgeon-specific information. We took this approach to ensure the privacy of both the participating sites and surgeons.

Q: Why does the PUF exclude specific dates?

A: In order to release the PUF, certain adjustments to the data are required to ensure proper protection of patient information. To meet these requirements, we remove all elements of dates (except quarter of admission and year) for dates directly related to an individual. For more information on the 18 data elements that are required for removal, please visit: http://privacyruleandresearch.nih.gov/ http://privacyruleandresearch.nih.gov/pdf/HIPAA_Booklet_4-14-2003.pdf.

Q: I am the Surgeon Champion or Surgical Clinical Reviewer from a site that has records in the PUF and would like to know which specific records are ours.

A: At this time we do not provide site identification of any cases in the PUF, even self-identification.

Values in the Data

Q: For each of the following complications, Pneumonia, On Ventilator > 48 hours, Urinary Tract Infection, and Bleeding Transfusion, one case did not have a known duration from operation to complication. Why is that?

A: In each of these complications the case had an invalid date which inhibited the calculation of duration. The number of days from operation to complication variable is coded as -99 for these cases.

Q: What are the probability scores for mortality and morbidity and how often are they calculated?

A: The probabilities of mortality and morbidity are provided in this database for all surgery cases in 2017. These probabilities are derived using hierarchical regression analysis, but based only on patient-level effects. They represent the probability (0 to1) that a case will experience a morbidity or mortality event based on pre-existing conditions. These probabilities are calculated every six months for the previous 12 months of data so the algorithm used to generate the predicted values changes over time as does the data used to create the algorithm.

Q: Which calculated probabilities of mortality and morbidity are supplied in this data set?

A: The probabilities of mortality and morbidity for all surgical cases used in the risk-adjusted analysis in 2017 are provided.

Q: Why do some of the preoperative lab values have duration from lab to operation, but a value of -99 for the lab value?

A: The results of the lab tests can be entered manually and thus are susceptible to data entry error. Depending on the preoperative lab variable roughly 1% of the cases had invalid values and these invalid values were set to -99 to simplify analysis. It is also possible that some cases have valid lab values, but are missing duration from lab to operation variable. This discrepancy is also related to a data entry error and the program continues to improve the data collection software to minimize the potential for data entry errors.

Q: When performing analysis on the five digit CPT codes in the Other and Concurrent variables, how should I interpret those cases with a valid five digit CPT code but a CPT description set to NULL?

A: If the case has a valid five digit CPT code that procedure occurred and should be evaluated as such. The CPT description is a secondary variable and provided for convenience. In the processing of large amounts of data some descriptions are purposefully or inadvertently removed.

File Formats

Q: In what file formats are the data available?

A: The data files are made available in a tab delimited TXT file, an SPSS file, and a SAS file.

Target AAA (Abdominal Aortic Aneurysm)

Position #	Variable Name	Data Type	Searching term in Chap 4 for Targeted AAA Open	Variable Options or comments
1	CASEID	NUM		You need this unique CASEID to merge with regular PUF dataset.

14	THY_NEOPLASM	CHAR	Neoplasm	No
				Yes

Target Thyroidectomy

Position #	Variable Name	Data Type	Searching term in Chap 4 for Targeted Thyroidectomy	Variable Options or comments
15	THY_NEOPLASM_TYPE	CHAR	If Neoplasm, Type of Neoplasm	Anaplastic cancer / poorly differentiated cancer
				Follicular adenoma
				Follicular cancer
				Hurthle cell adenoma
				Hurthle cell cancer
				Medullary cancer
				NULL=missing
				Other benign (ie- hyperplastic nodule, colloid nodule, hashimoto's thyroiditis, pseudonodule, trabecular adenoma)
				Other malignant
				Papillary cancer
16	THY_TUMOR_T	CHAR	If Cancer, Tumor T Classification	N/A
				T0
				T1
				T1a
				T1b
				T2
				T3
				T4
				T4a
				T4b
				Tx
				Unknown
17	THY_MULTIFOCAL	CHAR	Multifocal Cancer	More than one spot of cancer-"multifocal", bilateral
				More than one spot of cancer-"multifocal", unilateral
				N/A
				Only one spot of cancer-"unifocal"

Target Thyroidectomy

Position #	Variable Name	Data Type	Searching term in Chap 4 for Targeted Thyroidectomy	Variable Options or comments
18	THY_LYMPH_N	CHAR	If Cancer, Lymph Node N Classification	N/A
				N0
				N1
				N1a
				N1b
				Nx
				Unknown
19	THY_NUMNODES	NUM	If Cancer, Number of Nodes Removed (if any)	
20	THY_DISTANTM_M	CHAR	If Cancer, Distant Metastasis M Classification	M0/Mx
				M1
				N/A
				Unknown
21	THY_CALCIUM	CHAR	Postoperative Calcium Level Checked	No/unknown
				Yes
22	THY_PARA	CHAR	Postoperative Parathyroid (PTH) Level Checked	No/unknown
				Yes
23	THY_CALCIUMD_REP	CHAR	Postoperative Calcium and Vitamin D Replacement	No-no calcium or vitamin D pills
				Unknown
				Yes-both oral calcium and oral vitamin D pills
				Yes-oral calcium pills
				Yes-oral vitamin D pills
24	THY_HYPOCALC	CHAR	Significant Postoperative Hypocalcemia Prior to Discharge	NULL=missing
				No
				Yes
25	THY_HYPOCALC_UNK	NUM	Significant Postoperative Hypocalcemia Prior to Discharge Unknown	-99=missing

Target Thyroidectomy

Position #	Variable Name	Data Type	Searching term in Chap 4 for Targeted Thyroidectomy	Variable Options or comments
26	THY_HYPOCALC30	CHAR	Significant Postoperative Hypocalcemia Within 30 days	NULL=missing
				No
				Yes
27	THY_HYPOCALC30_UNK	NUM	Significant Postoperative Hypocalcemia Within 30 days Unknown	-99=missing
28	THY_HYPOCALC_EVENT	CHAR	Clinically Severe Hypocalcemia-related Event	No
				Yes
29	THY_HYPOCALC_EVENTTYPE	CHAR	Clinically Severe Hypocalcemia-related Event, Type of Event	Emergent evaluation in clinical office/emergency dept
				IV calcium supplementation
				IV calcium supplementation,Emergent evaluation in clinical office/emergency dept
				IV calcium supplementation,Emergent evaluation in clinical office/emergency dept,Readmitted for low calcium
				IV calcium supplementation,Readmitted for low calcium
				NULL=missing
				Readmitted for low calcium
30	THY_LARYNGEAL	CHAR	Recurrent Laryngeal Nerve (RLN) Injury or Dysfunction	No
				Unknown
				Yes-hoarseness/vocal cord
				Yes-severe hoarseness/voc
31	THY_NECK_HEMATOMA	CHAR	Neck Hematoma/Bleeding	No
				Unknown
				Yes-hematoma noted, addit
				Yes-hematoma noted, no ob
				Yes-hematoma noted, trach
				Yes-other intervention no

Target Esophagectomy

Position #	Variable Name	Data Type	Searching term in Chap 4 for Targeted Esophagectomy	Variable Options or comments
1	CASEID	NUM		You need this unique CASEID to merge with regular PUF dataset.
2	ESO_PET	CHAR	Preoperative PET Scan within 90 Days	NULL=missing
				No
				Yes
3	ESO_PET_UNK	NUM	Preoperative PET Scan within 90 Days Unknown	-99=missing
4	ESO_CHEMO	CHAR	Chemotherapy within 90 Days	NULL=missing
				No
				Yes
5	ESO_CHEMO_UNK	NUM	Chemotherapy within 90 Days Unknown	-99=missing
6	ESO_RADIO	CHAR	Radiation Therapy within 90 Days	NULL=missing
				No
				Yes
7	ESO_RADIO_UNK	NUM	Radiation Therapy within 90 Days Unknown	-99=missing
8	ESO_CLINPRE_T	CHAR	If Malignancy, Clinical Pretreatment T Stage	N/A
				T0
				T1
				T1a
				T1b
				T2
				T3
				T4

				T4b
				Tis
				Tx
				Unknown

Target Esophagectomy

Position #	Variable Name	Data Type	Searching term in Chap 4 for Targeted Esophagectomy	Variable Options or comments
9	ESO_CLINPRE_N	CHAR	If Malignancy, Clinical Pretreatment N Stage	N/A
				N0
				N1
				N2
				N3
				Nx
				Unknown
10	ESO_CLINPRE_M	CHAR	If Malignancy, Clinical Pretreatment M Stage	M0/Mx
				M1
				N/A
				Unknown
11	ESO_MIN_INVADE	CHAR	Minimally Invasive Approach	No
				Unknown/Other
				Yes-abdominal portion only
				Yes-both abdominal and thoracic components
				Yes-thoracic portion only
12	ESO_CONV_OPEN	CHAR	Conversion to Open Procedure	NULL=missing
				No
				Yes
13	ESO_CONV_OPEN_UNK	NUM	Conversion to Open Procedure Unknown	-99=missing
14	ESO_APPROACH	CHAR	Operative Approach	Hybrid
				Hybrid w/ open assist
				Hybrid w/ unplanned conversion to open
				Laparoscopic
				Laparoscopic w/ open assist
				Laparoscopic w/ unplanned conversion to open
				Open (planned)
				Other MIS approach
				Other MIS approach w/ open assist
				Other MIS approach w/ unplanned conversion to open
				Robotic
				Robotic w/ open assist

Target Esophagectomy

Position #	Variable Name	Data Type	Searching term in Chap 4 for Targeted Esophagectomy	Variable Options or comments
14	ESO_APPROACH	CHAR	Operative Approach	Robotic w/ unplanned conversion to open
				Thoracoscopic
				Thoracoscopic w/ open assist
				Thoracoscopic w/ unplanned conversion to open
				Unknown
15	ESO_PATHDIAG	CHAR	Pathologic Diagnosis	Adenocarcinoma
				Dysplasia
				No malignancy
				Other-benign
				Other-malignant
				Squamous cell carcinoma
				Unknown
16	ESO_PATH_T	CHAR	If Malignancy, Pathologic T Stage	N/A
				T0
				T1
				T1a
				T1b
				T2
				T3
				T4
				T4a

				N3
				Nx
				Unknown

Target Esophagectomy

Position #	Variable Name	Data Type	Searching term in Chap 4 for Targeted Esophagectomy	Variable Options or comments
18	ESO_PATH_M	CHAR	If Malignancy, Pathologic M Stage	M0/Mx
				M1
				N/A
				Unknown
19	ESO_MARGINS_POS	CHAR	Positive Margins	N/A
				No
				Unknown
				Yes-distal/gastric
				Yes-other description/combination
				Yes-proximal esophagus
				Yes-radial
20	ESO_ANASTOMIC	CHAR	Anastomotic Leak	Leak, no treatment intervention documented
				Leak, treated w/ interventional means
				Leak, treated w/ non-interventional means
				Leak, treated w/ reoperation
				No definitive diagnosis of leak/leak related abscess

Target Appendectomy

Position #	Variable Name	Data Type	Searching term in Chap 4 for Targeted Appendectomy	Variable Options or comments
1	CASEID	NUM		You need this unique CASEID to merge with regular PUF dataset.
2	APP_IMG_ULTRA	CHAR	Ultrasound Imaging Prior to Appendectomy	US done-consistent with appendicitis
				US done-indeterminate; result uncertain
				US done-not consistent with appendicitis
				US not performed/not documented
3	APP_SETTING_ULTRA	CHAR	Setting of Ultrasound	No US performed
				US at outside facility
				US in operating hospital
4	APP_IMG_CT	CHAR	CT (cross sectional) Imaging Prior to Appendectomy	CT done-result consistent with diagnosis of appendicitis
				CT done-result indeterminate; result uncertain
				CT done-result not consistent with appendicitis
				CT not performed/not documented
5	APP_SETTING_CT	CHAR	Setting of CT (cross sectional) Scan	CT at outside facility
				CT in operating hospital
				No CT performed
6	APP_MRI	CHAR	MRI or Other Definitive Imaging Modality Prior to Appendectomy	MRI / Other Definitive Imaging Modality Not Performed / Not Documented
				Result Indeterminate / Uncertain
				Result Not Consistent w/ Appendicitis; Appendix "Normal"
				Result consistent w/ diagnosis of Appendicitis
7	APP_SETTING_MRI	CHAR	Setting of MRI or Other Definitive Imaging Modality	No MRI/Other Definitive Imaging Modality Performed
				Performed at Outside Facility
				Performed in Operating Hospital
8	APP_PATHRES	CHAR	Pathology Results Indicates Appendicitis	Consistent with appendicitis
				Not consistent with appendicitis
				Other appendiceal pathology
				Pathology report not available
				Result is indeterminate or uncertain
				Tumor/malignancy involving appendix
				Unknown

Target Appendectomy

Position #	Variable Name	Data Type	Searching term in Chap 4 for Targeted Appendectomy	Variable Options or comments
9	APP_PERFABSCESS	CHAR	Perforation/Abscess of the Appendix	Abscess only
				No mention of perforation or abscess
				Perforation and abscess
				Perforation only
10	APP_APPROACH	CHAR	Operative Approach	Endoscopic w/ unplanned conversion to open
				Laparoscopic
				Laparoscopic w/ open assist
				Laparoscopic w/ unplanned conversion to open
				Open (planned)
				Other
				Robotic
				Robotic w/ open assist
				Robotic w/ unplanned conversion to open
				SILS
				Unknown
11	APP_APPENDIX	CHAR	If Laparoscopic/MIS Procedure, Appendix Placed in a Specimen Bag Prior to Removal	N/A
				No
				Yes
12	APP_INTRAABSCESS	CHAR	Postoperative Intra-abdominal Abscess	No diagnosis of postoperative abscess
				Unknown
				Yes-IV antibiotics w/out procedural intervention
				Yes-no treatment or intervention
				Yes-oral/IM antibiotics w/out procedural intervention
				Yes-percutaneous drainage
				Yes-reoperation for surgical drainage, minimally invasive
				Yes-reoperation for surgical drainage, open
				Yes-transrectal/other endoscopic drainage

Target Gyne-Reconstruction

Position #	Variable Name	Data Type	Searching term in Chap 4 for Targeted Reconstruction	Variable Options or comments
