DATA USE AGREEMENT

The Trauma Quality Programs (TQP) Participant Use File (PUF) Data Use Agreement implements the data protections of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and the ACS TQIP Hospital Participation Agreement (HPA). Any individual seeking to obtain or use the data in the TQP PUF must agree to the terms in the Data Use Agreement prior to the release of the designated PUF(s).

The requestor may view and download the current Data Use Agreement during the TQP PUF dataset request. The requestor is required to type in their first and last name and click on “Continue” to proceed with the TQP PUF request process. By clicking on “Continue,” the requestor agrees to the terms and conditions of said Data Use Agreement.

TQP PUF requests must be focused on a specific research question that should be stated clearly in the application. Prior to planning to submit a TQP PUF application, you are advised to read the information on the [TQP PUF Website](#). Specifically, applicants should review the appropriate TQP PUF User Manuals and [NTDS Data Dictionary](#) in order to understand available data elements and their limitations that could impact the proposed research.

The American College of Surgeons Committee on Trauma collects and maintains the TQP PUF. Therefore, use of any information from the TQP PUF must include a prominent citation. The citation is to read as follows, filling in the version number and year as:

Committee on Trauma, American College of Surgeons. TQP PUF Admission Year.Version (e.g., 2020.1.0), Chicago, IL, 20XX. The content reproduced from the TQP PUF remains the full and exclusive copyrighted property of the American College of Surgeons. The American College of Surgeons is not responsible for any claims arising from works based on the original data, text, tables, or figures.

RECORD AND FACILITY COUNTS BY YEAR

TQP Facilities in PUF by Year: 2007-2022

TQP Records in PUF by Year: 2007-2022

TQP PUF DESIGN OVER TIME

The American College of Surgeons (ACS) Trauma Quality Programs (TQP) reserves the right to change the format of the PUF dataset from year to year. As such, researchers should consult the documentation provided for each TQP PUF year separately.

In 2017, the ACS TQP transitioned to a new technical vendor. Because of this transition, we redesigned our data infrastructure, and that infrastructure is reflected in the design of the TQP PUF **starting** with AY 2017 data. Researchers using data from before and after this change for a single project are responsible for integrating those designs and should reference the documentation provided in the AY 2017 dataset.

DATASET DETAILS

The TQP PUF is a set of relational tables containing elements as defined by the National Trauma Data Standard (NTDS) for each respective admission year. It is ***strongly recommended*** that anyone using the TQP PUF consults the NTDS for each admission year involved in their research to ensure familiarity with data definitions and to understand how those definitions may have shifted across years.

These tables are provided in ASCII-CSV (comma separated value) format and standard SAS (*.sas7bdat) data tables. The relational tables are generally too large to be analyzed in Excel, but have been used in SAS, STATA, SPSS, Access, and Tableau.

Two different classes of tables exist in the data set:

- **Clinical record tables**
 - Table with information related to each clinical record, either one-to-one in design or many-to-one in design.
 - These tables include a unique record identifier (INC_KEY) for merging tables together.
- **Lookup tables**
 - The remaining tables are lookup tables with descriptions of relevant code sets.
 - These tables can be merged with clinical record tables using the code from the relevant coding standard (e.g. AIS).

Note that due to TQP PUF restructuring first applied with admission year (AY) 2017 data, all following tables and elements are listed as starting in 2017.

If you are interested in linking TQP PUF data from 2016 or before with more recent PUFs, please see the section in this document titled *TQP PUF Design Over Time*

Table Name	Admission Years	Description
PUF_AIS05TO98_CROSSWALK	2017 - 2019	Crosswalk from AIS (Abbreviated Injury Scale) 05/08 codes to AIS 98 codes. Replaced by PUF_AIS15TO05_CROSSWALK in 2020
PUF_AIS15TO05_CROSSWALK	2020 - 2022	Crosswalk from AIS 15 codes to AIS 05/08 codes. Can be merged with PUF_AISDIAGNOSIS
PUF_AISDIAGNOSIS	2017 - 2022	AIS codes
PUF_AISDIAGNOSIS_LOOKUP	2017 - 2022	AIS code descriptions, etc. Can be merged with PUF_AISDIAGNOSIS
PUF_ECODE_LOOKUP	2017 - 2022	ICD-10-CM External Cause Code descriptions, mechanisms, etc. Can be merged with PUF_TRAUMA
PUF_FORMATS	2017 - 2018	<i>Metadata:</i> Formats applied to other tables in this dataset. Replaced by PUF_TRAUMA_LOOKUP in 2019
PUF_HOSPITALEVENTS	2019 - 2022	Hospital events
PUF_ICDDIAGNOSIS	2017 - 2022	ICD-10-CM diagnosis codes
PUF_ICDDIAGNOSIS_LOOKUP	2017 - 2022	ICD-10-CM diagnosis codes descriptions, etc. Can be merged with PUF_ICDDIAGNOSIS
PUF_ICDPROCEDURE	2017 - 2022	ICD-10-CM procedure codes
PUF_ICDPROCEDURE_LOOKUP	2017 - 2022	ICD-10-CM procedure code descriptions, etc. Can be merged with PUF_ICDPROCEDURE
PUF_PREEXISTINGCONDITIONS	2019 - 2022	Pre-existing conditions
PUF_TRAUMA	2017 - 2022	Record-level NTDS data other than diagnosis codes (ICD, AIS), procedure codes, hospital events, and pre-existing conditions
PUF_TRAUMA_LOOKUP	2019 - 2022	<i>Metadata:</i> Formats applied to other tables in this dataset
TQP_INCLUSION	2017 - 2022	Information about a record's affiliation with a Trauma Quality Improvement Program (TQIP) facility, and whether that record met TQIP inclusion criteria for any TQIP reporting products

ELEMENT DESCRIPTION LIST

This section includes the definition, addition year, retirement year, and notes about each element. For more detail related to data formats, length, etc., please refer to the *PUF Dictionary by Admission Year* companion document.

For clinical definitions of all data elements, please consult the NTDS Data Dictionary for each respective admission year.

Some elements in the PUF_TRAUMA table are TQIP Processes of Care Measures. These elements are only requested from Level I and II TQIP trauma centers and are subject to specific collection criteria noted in the NTDS Data Dictionary. These criteria are important to consider when defining your analyses. These elements are marked with a “**PM**” in the *Description* column.

NOTE: All data elements have Common Null Values (blank inappropriate values, here forth known as BIU Values) as valid values unless specified.

BIU Element Values and Definitions

- 1: Not Applicable
 - This null value code applies if, at the time of patient care documentation, the information requested was “Not Applicable” to the patient, the hospitalization or the patient care event.
- 2: Not Known/Not Recorded
 - This null value applies if, at the time of patient care documentation, information was “Not Known” to the patient, family, or health care provider or the information was unavailable in the chart for abstraction.
- 3: Missing Discharge Disposition
 - This null value applies if, at the time of the Days/Hours element calculation, the Hospital Discharge Disposition or the ED Discharge Disposition is missing.
- 4: Discharge Disposition Conflict
 - This null value applies if, at the time of the Days/Hours element calculation, ED/Hospital Discharge Dispositions and corresponding Discharge Dates/Times do not align; e.g., patient is discharged home from ED but Hospital Discharge Date/Time are reported.
- 5: Missing Date/Time
 - This null value applies if, at the time of the Days/Hours element calculation, the Date/Time information is not available.
- 7: Finished Before Start
 - This null value applies if, at the time of the Days/Hours element calculation, the Date/Times for the ending data element occurs prior to the starting data element; e.g., Procedure Date is before Hospital Arrival Date.
- 8: Finished After Discharge
 - This null value applies if, at the time of the Days/Hours element calculation, the submitted Date/Time information occurs after Final Discharge.
- 9: Date After Call for Data
 - This null value applies if, at the time of the Days/Hours element calculation, the submitted Date/Time information occurs after the patient record was received by Trauma Quality Programs.

Table Name: PUF_AIS05TO98_CROSSWALK

Definition: Crosswalk from AIS 05 codes to AIS 98 codes. This crosswalk is not meant as a bidirectional crosswalk.

Frequency: One row per AIS 05 diagnosis code

Element Name	Definition	Year Added	Retired After	Notes
AIS05_PREDOT	Pre-dot of the AIS 05 source code	2017	2019	Link to PUF_AISDIAGNOSIS.AISP REDOT
AIS05_SEVERITY	Severity of the AIS 05 source code	2017	2019	
AIS98_PREDOT	Pre-dot of the AIS 98 destination code	2017	2019	
AIS98_SEVERITY	Severity of the AIS 98 destination code	2017	2019	
AIS98_DESCRIPTOR	The description of the AIS 98 destination code	2017	2019	

Table Name: PUF_AIS15TO05_CROSSWALK

Definition: Crosswalk from AIS 15 codes to AIS 05/08 codes. This crosswalk is not meant as a bidirectional crosswalk.

Frequency: One row per AIS 15 diagnosis code

Element Name	Definition	Year Added	Retired After	Notes
AIS15_PREDOT	Pre-dot of the AIS 15 source code	2020	None	Link to PUF_AISDIAGNOSIS.AISP REDOT
AIS15_SEVERITY	Severity of the AIS 15 source code	2020	None	
AIS05_PREDOT	Pre-dot of the AIS 05/08 destination code	2020	None	
AIS05_SEVERITY	Severity of the AIS 05/08 destination code	2020	None	
AIS_DESCRIPTOR	The description of the AIS 05/08 destination code	2020	None	

Table Name: PUF_AISDIAGNOSIS

Definition: AIS (Abbreviated Injury Scale) codes

Frequency: Multiple rows per record possible

Element Name	Definition	Year Added	Retired After	Notes
INC_KEY	Unique identifier for each record	2017	None	Link to PUF_TRAUMA.INC_KEY
AISPREDOT	AIS diagnosis pre-dot value	2017	None	Full AIS codes are documented as AISPREDOT.AISSEVERITY (e.g. XXXXXX.X), but the components are separated in the PUF
AISPREDOT_BIU	AIS diagnosis pre-dot BIU	2017	2018	BIU element
AISSEVERITY	AIS diagnosis severity value	2017	None	
AISSEVERITY_BIU	AIS diagnosis severity BIU	2017	2018	BIU element
AISVERSION	The version of AIS used to code the incident	2017	None	

Table Name PUF_AISDIAGNOSIS_LOOKUP

Definition: Lookup table for AIS diagnosis codes

Frequency: One row per AIS diagnosis code

Element Name	Definition	Year Added	Retired After	Notes
AISPREDOT	AIS diagnosis pre-dot value	2017	None	Link to PUF_AISDIAGNOSIS.AISPREDOT
AISSEVERITY	AIS diagnosis severity value	2017	None	
AISDESCRIPTION	AIS diagnosis code (AISPREDOT.AISSEVERITY) description	2017	None	
AISVERSION	AIS version for this AIS diagnosis code	2017	None	
ISSREGION	ISS body region for this AIS diagnosis code	2017	None	

Table Name: PUF_ECOCODE_LOOKUP

Definition: Lookup table for ICD CM External Cause Codes (E-codes). The content of this table was developed by a collaboration between the ACS and the CDC.

Frequency: One row per ICD CM E-code

Element Name	Definition	Year Added	Retired After	Notes
ECODE	Unique ICD CM E-Code	2017	None	Link to PUF_TRAUMA.PRIMARYECODEICD10
ECODE_DESC	Description of each ICD CM E-Code	2017	None	
INTENT	Injury intentionality	2017	None	
MECHANISM	Mechanism of injury	2017	None	
TRAUMA_TYPE	Trauma type	2017	None	
ICD_VERSION	ICD CM diagnosis code version	2017	None	

Table Name: PUF_HOSPITALEVENTS

Definition: Hospital Events

Frequency: Multiple rows per record possible

Element Name	Definition	Year Added	Retired After	Notes
INC_KEY	Unique identifier for each record	2019	None	Link to PUF_TRAUMA.INC_KEY
HOSPITALEVENT	Hospital Event	2019	None	Hospital Event code text provided in PUF_TRAUMA_LOOKUP
HOSPITALEVENTANSWER	Hospital Event Answer	2019	None	
HOSPITALEVENTANSWER_BIU	Hospital Event Answer BIU	2019	None	BIU element

Table Name: PUF_ICDDIAGNOSIS

Definition: ICD CM diagnosis codes

Frequency: Multiple rows per record possible

Element Name	Definition	Year Added	Retired After	Notes
INC_KEY	Unique identifier for each record	2017	None	Link to PUF_TRAUMA.INC_KEY

Element Name	Definition	Year Added	Retired After	Notes
ICDDIAGNOSISCODE	ICD CM diagnosis code	2017	None	
ICDDIAGNOSISCODE_BIU	ICD CM diagnosis code BIU	2017	2018	BIU element
ICDDIAGNOSISVERSION	ICD CM version	2017	None	

Table Name: PUF_ICDDIAGNOSIS_LOOKUP

Definition: Lookup table for ICD CM diagnosis codes

Frequency: One row per ICD CM diagnosis code

Element Name	Definition	Year Added	Retired After	Notes
ICDDIAGNOSISCODE	ICD CM diagnosis code value	2017	None	Link to PUF_ICDDIAGNOSIS.ICDDIAGNOSISCODE
ICDDIAGNOSISCODE_DESC	ICD CM diagnosis code description	2017	None	
ICD_VERSION	ICD CM diagnosis code version	2017	None	

Table Name: PUF_ICDPROCEDURE

Definition: ICD CM procedure codes

Frequency: Multiple rows per record possible

Element Name	Definition	Year Added	Retired After	Notes
INC_KEY	Unique identifier for each record	2017	None	Link to PUF_TRAUMA.INC_KEY
ICDPROCEDURECODE	ICD CM procedure code	2017	None	
ICDPROCEDURECODE_BIU	ICD CM procedure code BIU	2017	2018	BIU element
ICDPROCEDUREVERSION	ICD CM procedure code version	2017	None	
HOSPITALPROCEDURESTARTHRS	Number of hours from ED/hospital arrival until the beginning of procedure	2019	None	Calculated by ACS from submitted procedure dates/times. Replaces PROCEDUREMINS
HOSPITALPROCEDURESTARTDAYS	Number of days from ED/hospital arrival until the beginning of procedure	2019	None	Calculated by ACS from submitted procedure dates/times. Replaces PROCEDUREDAYS
HOSPITALPROCEDURESTART	Hospital Procedure Start	2019	None	BIU element

Element Name	Definition	Year Added	Retired After	Notes
ESTARTDH_BIU	Days/Hours BIU			
PROCEDUREMINS	Number of minutes from ED/hospital arrival until the beginning of procedure	2017	2018	Calculated by ACS from submitted procedure dates/times. Replaced by HOSPITALPROCEDURESTARHRS in 2019.
PROCEDUREDAYS	Number of days from ED/hospital arrival until the beginning of procedure	2017	2018	Calculated by ACS from submitted procedure dates. Replaced by HOSPITALPROCEDURESTARDDAYS in 2019.

Table Name: PUF_ICDPROCEDURE_LOOKUP

Definition: Lookup table for ICD CM procedure codes

Frequency: One row per ICD CM procedure code

Element Name	Definition	Year Added	Retired After	Notes
ICDPROCEDURE CODE	ICD CM procedure code value	2017	None	Link to PUF_ICDPROCEDURE.ICDPROCEDURECODE
ICDPROCEDURE CODE_DESC	ICD CM procedure code description	2017	None	
ICD_VERSION	ICD CM procedure code version	2017	None	

Table Name: PUF_PREEXISTINGCONDITIONS

Definition: Pre-existing Conditions

Frequency: Multiple rows per record possible

Element Name	Definition	Year Added	Retired After	Notes
INC_KEY	Unique identifier for each record	2019	None	Link to PUF_TRAUMA.INC_KEY
PREEXISTINGCONDITION	Pre-existing Condition	2019	None	Pre-existing Condition code text provided in PUF_TRAUMA_LOOKUP
PREEXISTINGCONDITIONANSWER	Pre-existing Condition Answer	2019	None	
PREEXISTINGCONDITIONANSWER_BIU	Pre-existing Condition Answer BIU	2019	None	BIU element

Table Name: PUF_TRAUMA

Definition: Record-level NTDS data elements other than diagnosis codes (ICD, AIS) and procedure codes.

Frequency: One row per record

Element Name	Definition	Year Added	Retired After	Notes
INC_KEY	Unique identifier for each record	2017	None	
AGEYEARS	Age (years)	2017	None	Calculated by ACS from DOB or Age/Age Units. Age values < 1 or > 89 are blanked.
AIRBAG_DEPLOYED_FRNT	Airbag Deployment: Front	2017	None	Flattened many-to-one response values from Airbag Deployment
AIRBAG_DEPLOYED_NA	Airbag Deployment: Not Applicable	2017	None	BIU element
AIRBAG_NOTDEPLOYED	Airbag Deployment: Not Deployed	2017	None	Flattened many-to-one response values from Airbag Deployment
AIRBAG_DEPLOYED_UK	Airbag Deployment: Not Known/Not Recorded	2017	None	BIU element
AIRBAG_DEPLOYED_OTHER	Airbag Deployment: Other	2017	None	Flattened many-to-one response values from Airbag Deployment
AIRBAG_DEPLOYED_SIDE	Airbag Deployment: Side	2017	None	Flattened many-to-one response values from Airbag Deployment
ISSVERSION	AIS version used to derive ISS	2020	None	
ISS_05	AIS-derived ISS	2017	2019	Calculated by ACS from AIS diagnoses
ISS	AIS-derived ISS	2020	None	Calculated by ACS from AIS diagnoses
ALCOHOLSCREEN	Alcohol Screen	2017	None	
ALCOHOLSCREEN_BIU	Alcohol Screen BIU	2017	None	BIU element
ALCOHOLSCREENRESULT	Alcohol Screen Result	2017	None	
ALCOHOLSCREENRESULT_BIU	Alcohol Screen Result BIU	2017	None	BIU element
HOMERESIDENCE_HOMELESS	Alternate Home Residence: Homeless	2021	None	
HOMERESIDENCE_NA	Alternate Home Residence: Not Applicable	2021	None	BIU Element

Element Name	Definition	Year Added	Retired After	Notes
HOMERESIDENCE_UK	Alternate Home Residence: Not Known/Not Recorded	2021	None	BIU Element
HOMERESIDENCE_OTHER	Alternate Home Residence: Other	2021	None	Derived from Alternate Home Residence: Migrant and/or Undocumented
CAREGIVERATDISCHARGE	Caregiver at Discharge	2017	2019	
CAREGIVERATDISCHARGE_BIU	Caregiver at Discharge BIU	2017	2019	BIU element
CHILDSPECIFICRESTRAINT	Child Specific Restraint	2017	None	
CC_ADLC	Comorbid Condition: Advanced Directive Limiting Care	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_ALCOHOLISM	Comorbid Condition: Alcohol Use Disorder	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_ANGINAPECTORIS	Comorbid Condition: Angina Pectoris	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_ANTICOAGULANT	Comorbid Condition: Anticoagulant Therapy	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_ADHD	Comorbid Condition: Attention Deficit Disorder/Attention Deficit Hyperactivity Disorder (ADD/ADHD)	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_BLEEDING	Comorbid Condition: Bleeding Disorder	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_CVA	Comorbid Condition: Cerebrovascular Accident (CVA)	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_COPD	Comorbid Condition: Chronic Obstructive Pulmonary Disease (COPD)	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_RENAL	Comorbid Condition: Chronic Renal Failure	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.

Element Name	Definition	Year Added	Retired After	Notes
CC_CIRRHOSIS	Comorbid Condition: Cirrhosis	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_CONGENITAL	Comorbid Condition: Congenital Anomalies	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_CHF	Comorbid Condition: Congestive Heart Failure	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_SMOKING	Comorbid Condition: Current Smoker	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_CHEMO	Comorbid Condition: Currently Receiving Chemotherapy for Cancer	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_DEMENTIA	Comorbid Condition: Dementia	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_DIABETES	Comorbid Condition: Diabetes Mellitus	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_DISCANCER	Comorbid Condition: Disseminated Cancer	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_FUNCTIONAL	Comorbid Condition: Functionally Dependent Health Status	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_HYPERTENSION	Comorbid Condition: Hypertension	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_MENTALPERSONALITY	Comorbid Condition: Mental/Personality Disorder	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_MI	Comorbid Condition: Myocardial Infarction (MI)	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_NA	Comorbid Condition: Not Applicable	2017	2018	BIU element
CC_UK	Comorbid Condition: Not Known/Not Recorded	2017	2018	BIU element
CC_OTHER	Comorbid Condition:	2017	2018	Moved to

Element Name	Definition	Year Added	Retired After	Notes
	Other			PUF_PREEXISTINGCONDITIONS table in 2019.
CC_PAD	Comorbid Condition: Peripheral Arterial Disease (PAD)	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_PREMATURITY	Comorbid Condition: Prematurity	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_STEROID	Comorbid Condition: Steroid Use	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
CC_SUBSTANCEABUSE	Comorbid Condition: Substance Abuse Disorder	2017	2018	Moved to PUF_PREEXISTINGCONDITIONS table in 2019.
DRGSCR_AMPHETAMINE	Drug Screen: AMP (Amphetamine)	2017	None	Flattened many-to-one response values from Drug Screen
DRGSCR_BARBITURATE	Drug Screen: BAR (Barbiturate)	2017	None	Flattened many-to-one response values from Drug Screen
DRGSCR_BENZODIAZEPINES	Drug Screen: BZO (Benzodiazepines)	2017	None	Flattened many-to-one response values from Drug Screen
DRGSCR_COCAINE	Drug Screen: COC (Cocaine)	2017	None	Flattened many-to-one response values from Drug Screen
DRGSCR_METHAMPHETAMINE	Drug Screen: mAMP (Methamphetamine)	2017	None	Flattened many-to-one response values from Drug Screen
DRGSCR_ECSTASY	Drug Screen: MDMA (Ecstasy)	2017	None	Flattened many-to-one response values from Drug Screen
DRGSCR_METHADONE	Drug Screen: MTD (Methadone)	2017	None	Flattened many-to-one response values from Drug Screen
DRGSCR_NONE	Drug Screen: None	2017	None	Flattened many-to-one response values from Drug Screen
DRGSCR_NA	Drug Screen: Not Applicable	2017	None	BIU element
DRGSCR_UK	Drug Screen: Not Known/Not Recorded	2017	None	BIU element
DRGSCR_NOTTESTED	Drug Screen: Not	2017	None	Flattened many-to-one

Element Name	Definition	Year Added	Retired After	Notes
	Tested			response values from Drug Screen
DRGSCR_OPIOID	Drug Screen: OPI (Opioid)	2017	None	Flattened many-to-one response values from Drug Screen
DRGSCR_OTHER	Drug Screen: Other	2017	None	Flattened many-to-one response values from Drug Screen
DRGSCR_OXYCODONE	Drug Screen: OXY (Oxycodone)	2017	None	Flattened many-to-one response values from Drug Screen
DRGSCR_PHENCYCLIDINE	Drug Screen: PCP (Phencyclidine)	2017	None	Flattened many-to-one response values from Drug Screen
DRGSCR_TRICYCLICDEPRESS	Drug Screen: TCA (Tricyclic Antidepressant)	2017	None	Flattened many-to-one response values from Drug Screen
DRGSCR_CANNABINOID	Drug Screen: THC (Cannabinoid)	2017	None	Flattened many-to-one response values from Drug Screen
EDDISCHARGEDISPOSITION	ED Discharge Disposition	2017	None	
EDDISCHARGEDISPOSITION_BIU	ED Discharge Disposition BIU	2017	None	BIU element

Table Name: TQP_INCLUSION

Definition: Information about TQP enrollment and TQIP inclusion criteria application

Frequency: One row per record

Element Name	Definition	Year Added	Retired After	Notes
INC_KEY	Unique identifier for each record	2017	None	Link to PUF_TRAUMA.INC_KEY
TQIPSITE	Facility Level: Record from a facility participating in TQIP	2017	None	Facility-level element provided at the record-level
ADULTTQIP	Record meeting Adult TQIP inclusion criteria from a participating facility. See FAQ for details.	2017	None	
PEDSTQIP	Record meeting Pediatric TQIP inclusion criteria from a participating facility. See FAQ for details.	2017	None	
L3TQIP	Record meeting Level III TQIP inclusion criteria from a participating facility. See FAQ for details.	2017	None	

FORMATS

Beginning with the 2017 TQP PUF, a formats table is included in both SAS and CSV formats. This file contains all the formats used for the TQP PUF dataset.

Format Locations

All variable formats used in the TQP PUF are contained in PUF_TRAUMA_LOOKUP SAS and CSV datasets (**PUF_FORMATS** for 2017/2018 PUFs). Variable Formats document the relationships between codes used in PUF datasets and their meanings; e.g., for variable Sex code 1 denotes 'Male' and code 2 is used to indicate 'Female'.

Most TQP PUF formats match the variable to which they apply. Below is a list of TQP PUF formats applied to variables with names that do not match:

- GCSEye. –GCS40Eye
- GCSMotor. –GCS40Motor, TBIGCS40Motor
- GCSVerbal. –GCS40Verbal
- BedSizeCat. – BedSize
- TraumaLevel. – VerificaitonLevel, PediatricVerificationLevel, StateDesignation, StatePediatricDesignation
- TeachingStatusInd - TeachingStatus
- YN. –
 - AmericanIndian, Asian, Black, PacificIslander, RaceOther, White, Race_NA, Race_UK
 - WorkRelated
 - ProtDev_None, ProtDev_Lap_Belt, ProtDev_PerFloat, ProtDev_ProtectGear, ProtDev_EyeProtect, ProtDev_Child_Restraint, ProtDev_Helmet, ProtDev_Airbag_Present, ProtDev_ProtectCloth, ProtDev_Shoulder_Belt, ProtDev_Other, ProtDev_NA, ProtDev_UK
 - AirBag_NotDeployed, AirBag_Deployed_FRNT, AirBag_Deployed_Side, AirBag_Deployed_Other, AirBag_Deployed_NA, AirBag_Deployed_UK
 - TM_GroundAmbulance, TM_HelicopterAmbulance, TM_FixedWingAmbulance, TM_PrivPubVehWalkin, TM_Police, TM_Other, TM_NA, TM_UK
 - InterFacilityTransfer
 - PreHospitalCardiacArrest
 - GCSQ_SedatedParalyzed, GCSQ_EyeObstruction, GCSQ_Intubated, GCSQ_Valid, GCSQ_NA, GCSQ_UK
 - DrgScr_Amphetamine, DrgScr_Barbiturate, DrgScr_Benzodiazepines, DrgScr_Cocaine, DrgScr_Methamphetamine, DrgScr_Ecstasy, DrgScr_Methadone, DrgScr_Opioid, DrgScr_Oxycodone, DrgScr_Phencyclidine, DrgScr_TricyclicDepress, DrgScr_Cannabinoid, DrgScr_Other, DrgScr_None, DrgScr_NotTested, DrgScr_UK, DrgScr_NA
 - AlcoholScreen
 - PMGCSQ_SedatedParalyzed, PMGCSQ_EyeObstruction, PMGCSQ_Intubated, PMGCSQ_Valide, PMGCSQ_NA, PMGCSQ_UK
 - ESLiver, ESSpleen, ESKidney, ESPelvis, ES Retro Peri, ESVascular,, ESOther, ES_UK, ES_NA
 - ICPEVDrain, ICPParench, ICPO2Monitor, ICPJVBulb, ICPNone, ICP_NA, ICP_UK
 - WithdrawalLST
 - AntibioticTherapy
 - Highest Activation

- HomeResidence_Homeless, HomeResidence_Other, HomeResidence_NA, HomeResidence_UK

Variable Formats

I. SAS datasets

- a. Variable formats are assigned to variables in all TQP PUF SAS datasets. Some variables that do not require a format are not assigned a format in TQP PUF SAS datasets.
- b. Formats need to be compiled for use in a SAS session by using PROC FORMAT SAS procedure 'CntlIn' option:

```
PROC FORMAT library = [specify desired permanent destination; temporary WORK  
library is used by default] CntlIn=[optional libname.]PUF_TRAUMA_LOOKUP;  
run;
```

II. CSV datasets

- a. Variable Formats associated with PUF Variable Names in each TQP PUF dataset are listed in the 'PUF Variable Formats.CSV' document
- b. TQP PUF Format codes and labels are listed in the PUF_TRAUMA_LOOKUP.csv dataset

DATA VALIDATION

Data contained in this dataset are validated at the time of submission using the validation system and rules defined in the NTDS Data Dictionary. For more information about those rules, please consult the NTDS Data Dictionary.

Beyond those rules, ACS has kept additional data validation processing to a minimum to allow researchers maximum flexibility and discretion to apply additional data validation as appropriate for their analyses. However, below are validations beyond NTDS validation rules which have been applied in the TQP PUF.

PUF_TRAUMA:

1. All calculated time (days/hours) elements are invalidated based on the following null values (see the *Element Description List* page for BIU element values and definitions):
 - Missing Discharge Disposition
 - Discharge Disposition Conflict
 - Missing Date/Time
 - Finished Before Start
 - Finished After Discharge
 - Date After Call for Data

PUF_ICDPROCEDURE:

1. Calculated hospital procedure start time (days/hours) elements are invalidated based on the following null values (see the *Element Description List* page for BIU element values and definitions):
 - Missing Date/Time
 - Finished Before Start
 - Finished After Discharge
 - Date After Call for Data

ADDITIONAL TQIP DATA VALIDATION:

Many TQP PUF elements are also used in the Trauma Quality Improvement Program (TQIP). Below are the processing rules for how TQIP invalidates these elements. Researchers using the TQP PUF can choose whether to invalidate TQP PUF data to follow TQIP's processing guidelines.

1. Invalidating of multi-select element combinations:

Completed for the following elements if 'Not Known/Not Recorded' AND 'Not Applicable' are both selected, or 'Not Known/Not Recorded' OR 'Not Applicable' is selected with any of the valid values.

- Embolization Site
- Intracranial Pressure
- Venous Thromboembolism
- Angiography
- Drug Screening
- Race
 - **Example:** *If patient's Race is Not Known/Not Recorded AND/OR Not Applicable AND patient has a Race of either American Indian, Asian, Black, Pacific Islander, White, or Other Race then all above Race elements (including Not Known/Not Recorded and Not Applicable) are set to missing.*

2. Invalidating submitted time elements if conflicting with length of stay:

- Ventilation Days
- ICU Length of Stay Days

3. Invalidating Vitals outside of the following ranges:

- Respiratory Rate
 - Cannot be greater than 120 for ages less than 6 years
 - Cannot be greater than 99 for ages 6 years or more
- SBP
 - Cannot be greater than 300 mmHg
- Pulse
 - Cannot be greater than 299 beats per minute
- Temperature
 - Cannot be greater than 45° Celsius
- Pulse Oximetry
 - Must be between 0 and 100

FREQUENTLY ASKED QUESTIONS

What are the system requirements for downloading the TQP PUF?

- Minimum of 6 GB of hard drive space for each admission year (CSV or SAS)
- Minimum of 16GB of RAM strongly recommended

What are the differences between the file types (CSV vs. SAS)

- SAS files are standard SAS data tables.
- CSV files are comma separated value files. We are aware that SAS handles CSVs inconsistently when using PROC IMPORT. Please use caution and check your datasets prior to analysis, including checking elements values against the element list.
 - The inconsistencies include: truncation of values and changing of element type (numeric to character).

How can I merge the tables in TQP PUF?

- The TQP PUF tables can be merged by using the unique key for each record (INC_KEY) or by using codes from a relevant coding standard (e.g. AIS) to merge with a lookup table.

Is the dataset HIPAA compliant or confidential?

- Yes, the data set is de-identified and no protected health information is provided.
- To further limit possible identification of hospitals or patients, records from Canadian facilities have been removed from the dataset. Additionally, patients < 1 or > 89 years of age have their PUF_TRAUMA.AGEYEARS blanked.
- TQP PUF data are maintained in a secure database with limited internal access. External users must gain permission to the database and data; users are then supplied data at the aggregate level only. Use of TQP PUF data is in strict compliance with the Health Insurance Portability and Accountability Act of 1996 (HIPAA).⁷ TQP does not distribute or report hospital information in any manner that allows the reporting hospital to be identified without the express written permission of the hospital. The dataset collected by TQP is considered a limited dataset under HIPAA.

Can I estimate the number of trauma patients in the US based on the TQP PUF?

- The TQP PUF is an incident-based database derived from a voluntary subset of trauma centers, and there are no linkable patient identifiers in the database. If a patient has more than one trauma incident during an admission year, this patient will be in the database twice.

What are the patient inclusion criteria for the TQP?

- Please see the NTDS Data Dictionary for each admission year to understand the yearly NTDS inclusion criteria. These criteria define which records are submitted to the TQP from participating facilities.
- While all TQP PUF records meet NTDS criteria, **not all records meet TQIP patient-level criteria.** Please use the TQP_INCLUSION table in the dataset to select TQIP patients by program type. The TQIP inclusion criterion, used for the AY 2022 TQP_INCLUSION table, are as follows:

Adult TQIP:

- Age greater than or equal to 16 years
- Blunt or penetrating trauma, or abuse of any trauma type (derived from Primary External Cause Code)
 - The “External Cause of Injury Matrix and Trauma Type Map” is currently available on the [NTDB website](#).
- At least one valid AIS 05/08 injury a with severity between 3 - 6 in AIS Chapters 1 – 8, or equivalent AIS 2015 injury
- Admitted patients (Hospital Discharge Disposition other than Not Known/Not Recorded or Not Applicable), or patients who died in the ED (ED Discharge Disposition = Deceased/Expired)

- *Exclude* patients discharged later than 30 days after the final admission date eligible for this report
- *Exclude* patients with a pre-existing advanced directive to withhold life sustaining interventions.
- *Exclude* patients indicated as dead on arrival (DOA) based on three Initial ED/Hospital vitals. Up to one of these three vitals can be unknown and the patient will still be excluded. The vitals and values excluded for this status are:
 1. GCS Motor or GCS 40 Motor
 - GCS Motor = 1 and/or “Sedated/Paralyzed” Qualifier
 - GCS 40 Motor = 1 or “Not Testable”
 2. Systolic Blood Pressure (SBP) = 0, and
 3. Pulse = 0
- *Exclude* patients with severe burns (as defined in TQIP Reporting Code Sets)

Pediatric TQIP:

- Age less than or equal to 18 years
- Blunt or penetrating trauma, or abuse of any trauma type (derived from Primary External Cause Code)
 - The “External Cause of Injury Matrix and Trauma Type Map” is currently available on the [NTDB website](#).
- At least one valid AIS 05/08 injury a with severity between 2 - 6 in AIS Chapters 1 – 8, or equivalent AIS 2015 injury
- Admitted patients (Hospital Discharge Disposition other than Not Known/Not Recorded or Not Applicable), or patients who died in the ED (ED Discharge Disposition = Deceased/Expired)

- *Exclude* patients discharged later than 30 days after the final admission date eligible for this report
- *Exclude* patients with pre-existing advanced directive to withhold life sustaining interventions
- *Exclude* patients indicated as dead on arrival (DOA) based on three Initial ED/Hospital vitals. Up to one of these three vitals can be unknown and the patient will still be excluded. The vitals and values excluded for this status are:
 1. GCS Motor or GCS 40 Motor
 - GCS Motor = 1 and/or “Sedated/Paralyzed” Qualifier
 - GCS 40 Motor = 1 or “Not Testable”
 2. Systolic Blood Pressure (SBP) = 0, and
 3. Pulse = 0
- *Exclude* patients with severe burns (as defined in TQIP Reporting Code Sets)

Level III TQIP:

- Age greater than or equal to 0
- Blunt or penetrating trauma, or abuse of any trauma type (derived from Primary External Cause Code)
 - The “External Cause of Injury Matrix and Trauma Type Map” is currently available on the [NTDB website](#).
- At least one valid AIS 05/08 injury a with severity between 2 - 6 in AIS Chapters 1 – 8, or equivalent AIS 2015 injury
 - Patients transferred from the ED are not required to meet this criterion
- Admitted patients (Hospital Discharge Disposition other than Not Known/Not Recorded or Not Applicable), or patients who either died in the ED (ED Discharge Disposition = Deceased/Expired) or were transferred from the ED (ED Discharge Disposition = Transferred to Another Hospital)

- *Exclude* patients discharged later than 30 days after the final admission date eligible for this report
- *Exclude* patients with an unknown time to transfer
- *Exclude* patients with a pre-existing advanced directive to withhold life sustaining interventions
- *Exclude* patients indicated as dead on arrival (DOA) based on three Initial ED/Hospital vitals. Up to one of these three vitals can be unknown and the patient will still be excluded. The vitals and values excluded for this status are:
 1. GCS Motor or GCS 40 Motor
 - GCS Motor = 1 and/or “Sedated/Paralyzed” Qualifier
 - GCS 40 Motor = 1 or “Not Testable”
 2. Systolic Blood Pressure (SBP) = 0, and
 3. Pulse = 0
- *Exclude* patients with severe burns (as defined in TQIP Reporting Code Sets)

PUBLICATIONS

We are pleased to note the increasing number of publications utilizing the TQP PUF, a listing of which we try to keep updated on our website. We recognize that the quality of these studies is element, and that some of them fail to acknowledge the limitations we have described above. We request that researchers using TQP PUF notify us of any publications and hope that the criticism of these studies will also help us find ways to improve the quality of the database. Authors should be aware that the following recommendations have been provided to the editors of journals most likely to publish articles based upon TQP PUF data:

Recommendations for Peer Review of Studies using the TQP PUF (From the NTDB Subcommittee, ACS Committee on Trauma, March 2007)

The ACS Committee on Trauma does not presume or desire to involve itself directly in the editorial process by which manuscripts are selected for publication. However, we do wish to inform this process and maximize the quality of these publications by making editors and reviewers aware of the obligations of licensees to the Trauma Quality Programs, as well as some of the technical issues posed by research involving this database.

Licensees have agreed to include a statement in their manuscripts acknowledging that “the TQP remains the full and exclusive copyrighted property of the American College of Surgeons. The American College of Surgeons is not responsible for any claims arising from works based on the original Data, Text, Tables, or Figures.”

Licensees have further agreed to include language indicating which version of the TQP PUF (e.g., Version 6.1) they are using. This is important since the database is updated frequently, and other researchers should be provided with enough information to allow replication of the findings using the same data set.

The TQP PUF tables provide only general information about contributing institutions, such as trauma center verification status and categorical number of beds. We and our licensees are committed to maintaining the confidentiality of contributing institutions and patients as mandated by federal law. Studies claiming to add information about hospitals or patients from sources outside the TQP PUF should therefore be evaluated with great caution. Reviewers may wish to verify assertions about the characteristics of contributing hospitals against the characteristics available in the TQP PUF.

Like any large database, the TQP PUF does not have complete data for all cases; therefore authors should be expected to state how they dealt with missing data (exclusion, imputation, etc.). Similarly, the TQP PUF is not a population-based dataset; therefore statements about the incidence of specific conditions are inappropriate if based only on NTDB data. This User Manual, which describes these and other sources of potential bias inherent to the TQP PUF, has been provided to all researchers with the database tables. Reviewers are advised to look for explicit discussion of these biases and their possible effects on the analysis.
